Digital Marketing Strategy 1

M2 - Inalco

Presentation

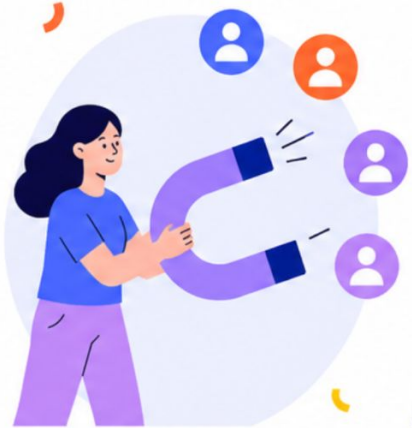

Liubov TREBUSHKOVA - Product Manager / Product Owner
liubov.trebushkova@inalco.fr

By the end of this course, you will be able to...

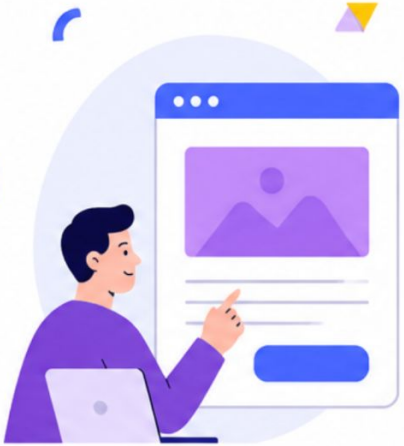

- Build a **complete marketing strategy**
- **Attract** the right customers
- **Convert** more visitors (optimize user experience)
- **Retain** loyal customers
- **Measure** marketing performance

=> Make **strategic decisions** and ensure the business **growth**

Acquire → Convert → Retain → Grow

Attract the right people to your brand.

Turn visitors into customers.

Build relationships and keep customers coming back.

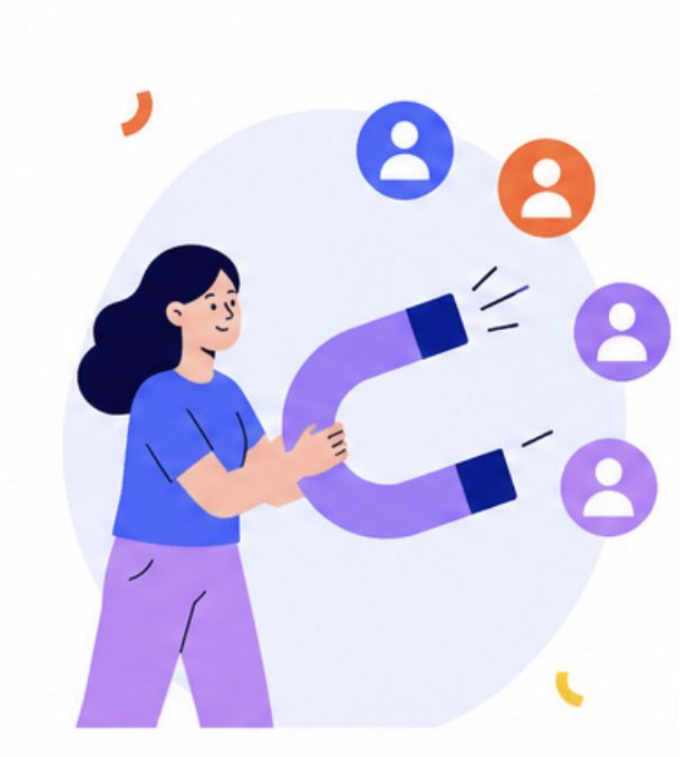

Increase value, get referrals, and scale sustainably.

Course Structure

Session	Focus	Students Build
1	Traffic and customer acquisition	Acquisition strategy
2	UX, CRO & Landing Pages	Landing page & conversion strategy
3	CRM, Retention & Growth	Customer lifecycle & growth strategy
4	Digital Marketing Today, AI & Strategy Integration	Complete marketing strategy

Traffic and customer acquisition

01

What is *Acquisition?*

Why do some products grow while others don’t?

What is Acquisition?

- SEO
- Paid Ads
- Social Media
- Content
- Partnerships
- Referral
- Influencers

Acquisition is often misunderstood as:

"getting traffic."

But traffic alone has no value.

The real objective is:

qualified users,
aligned with the product,
likely to convert or retain.

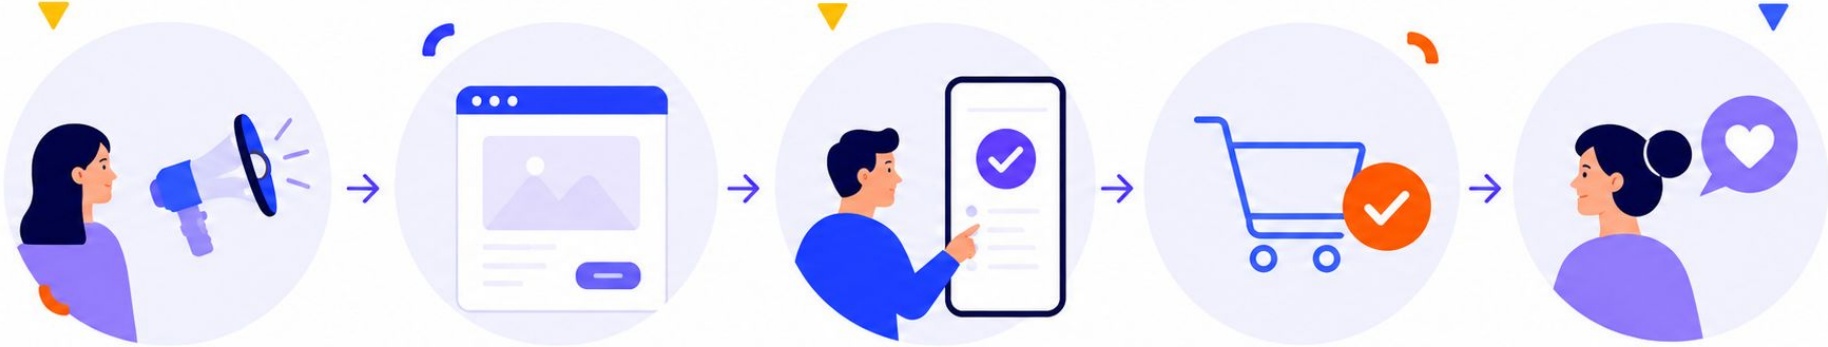

Quality over quantity.

Traffic vs Qualified Traffic

Traffic	Qualified Traffic
Many visitors	Relevant visitors
Weak intent	Strong intent
Low conversion	Higher conversion

The Acquisition Funnel

1 Awareness

People discover your brand.

2 Acquisition

They visit your website or engage with your content.

3 Activation

They experience your product or service for the first time.

4 Conversion

They take the desired action that delivers value.

5 Retention

They come back, stay loyal and become advocates.

02

Acquisition
Channels

Acquisition Channels

- **SEO** → Capture users with existing search intent
- **SEA (Paid Search)** → Generate immediate visibility and traffic
- **Social Media** → Create discovery and awareness
- **Content Marketing** → Build trust, credibility, and authority
- **Influencer Marketing** → Leverage borrowed attention and social proof
- **Referral Marketing** → Drive growth through customer recommendations

Search vs Discovery

SEARCH

Users are looking for something specific.

Intent: Active | Mindset: Problem-aware

Goal	Find the best solution or answer now
User behavior	Searches with intent ("CRM software", "best running shoes")
Where users find you	Search engines (Google, Bing...)
Content that performs	Optimized pages, blog posts, product pages, FAQs
Typical KPIs	Organic traffic, rankings, CTR, conversions

VS

DISCOVERY

Users are exploring and open to new ideas.

Intent: Passive | Mindset: Problem-unaware

Goal	Get inspired, learn, or explore options
User behavior	Scrolls, watches, browses, consumes content
Where users find you	Social media, videos, podcasts, newsletters, communities
Content that performs	Engaging content, videos, stories, educational posts
Typical KPIs	Reach, engagement, views, follows, saves, shares

Both are essential.

Search captures demand.
Discovery creates demand.

SEA, SEO, SEM?

1ere position

Search Engine Optimization (SEO)

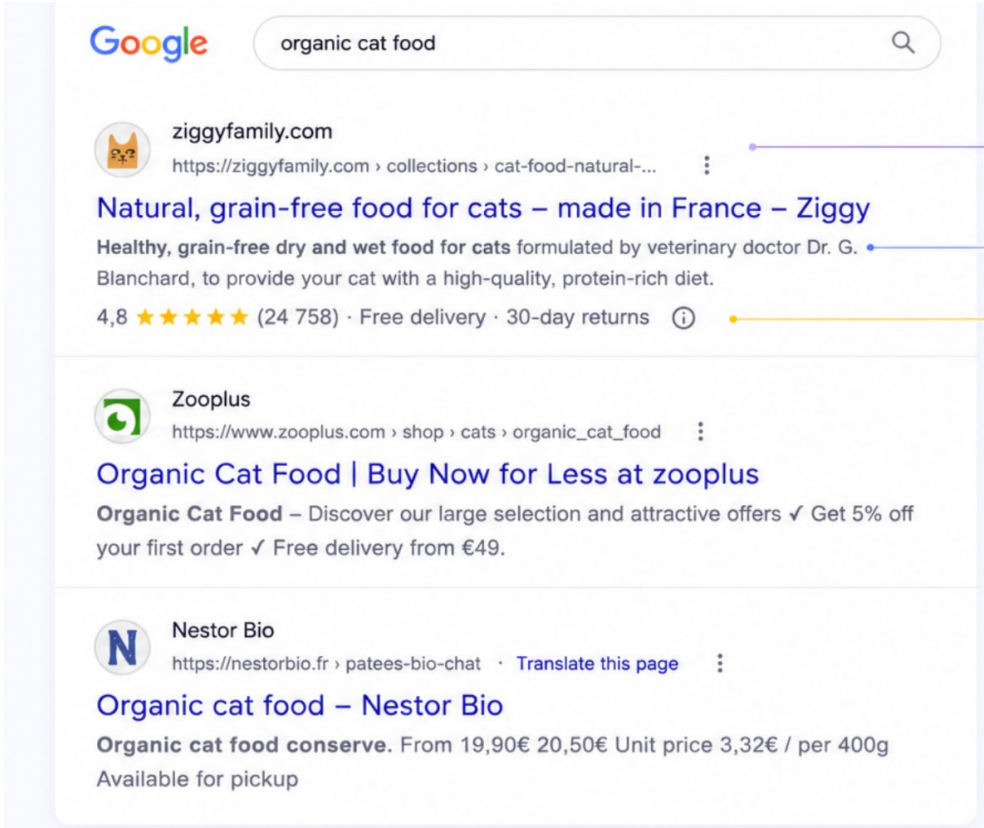

The practice of **improving a website's visibility in organic (non-paid) search engine results**.

Help users find your content when they are actively searching for information, products, or services => **it captures existing demand**.

SEO content:

- Product pages
- Blog articles
- Landing pages
- FAQs
- Guides

Search Result

URL
Short, descriptive and keyword-relevant. Helps search engines understand the page.

TITLE TAG
Clear and compelling.
Includes the main keyword and value proposition.

META DESCRIPTION
Summarizes the content and highlights benefits. Influences click-through rate (CTR).

RICH RESULTS
Ratings, reviews, delivery info, prices...
Add extra visibility and build trust.

Google may rewrite your title or meta description if it believes another version better matches the user's search query.

Technical Foundation
HTTPS
Mobile-friendly design
Fast loading speed
Crawlability & indexing
Structured data
Clear site architecture
Content Quality
Search intent alignment
Original, helpful content
Topical depth
Semantic relevance
Clear page structure (H1–H3)
Fresh and updated content
User Experience
Easy navigation
Internal linking
Images & videos
Readability
Accessibility
Clear calls-to-action
SEO
Helpful, trusted and discoverable website
Brand Visibility
Brand mentions
Digital PR
Social media presence
Community engagement
Content sharing
User Engagement
Click-through rate (CTR)
Time on page
Engagement
Returning visitors
Conversion signals
Authority
High-quality backlinks
Relevant referring websites
Topical authority
E-E-A-T signals
Citations & references

SEO

The practice of **improving a website's visibility in organic (non-paid) search engine results**.

Help users find your content when they are actively searching for information, products, or services => **it captures existing demand**.

SEO content:

- Product pages
- Blog articles
- Landing pages
- FAQs
- Guides

Traditional SEO Approach

1

Choose key words

Research search intent and select the right keywords to target.

2

Create and optimize the content

Create high-quality content that answers the user's intent and optimize on-page SEO.

3

Update, engage, optimize

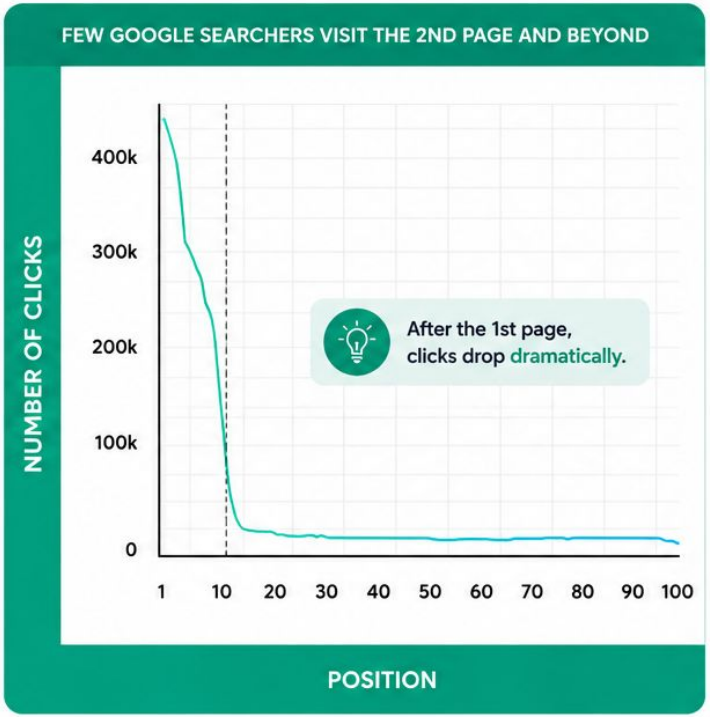

Keep content fresh, engage users, and continuously improve performance.

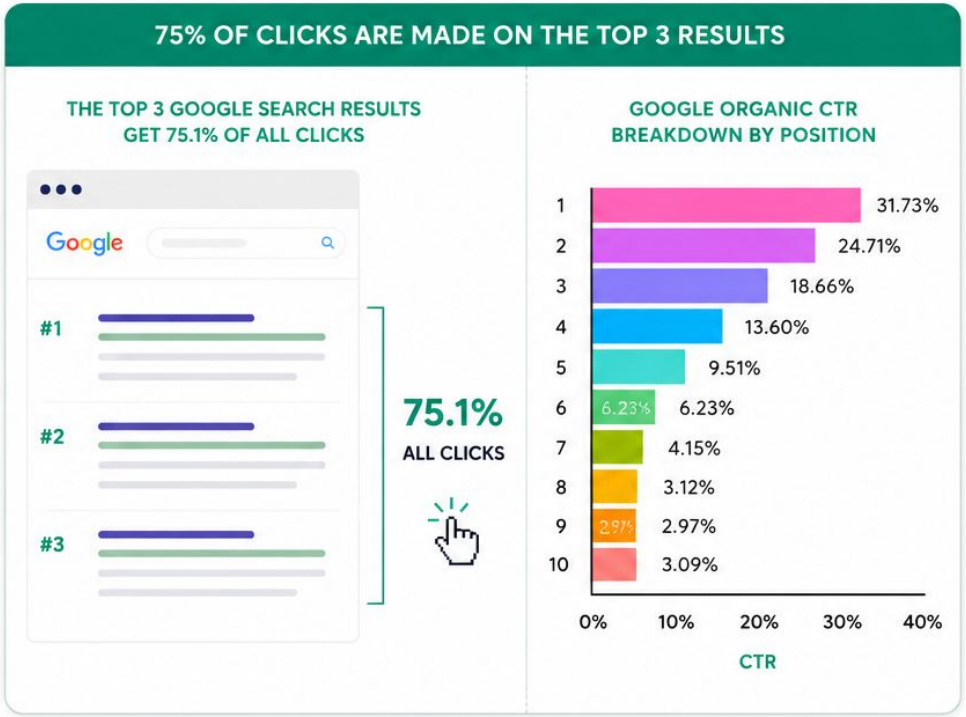

4

Define the content strategy and site structure

Plan your content pillars, cluster topics, and structure your site for users and search engines.

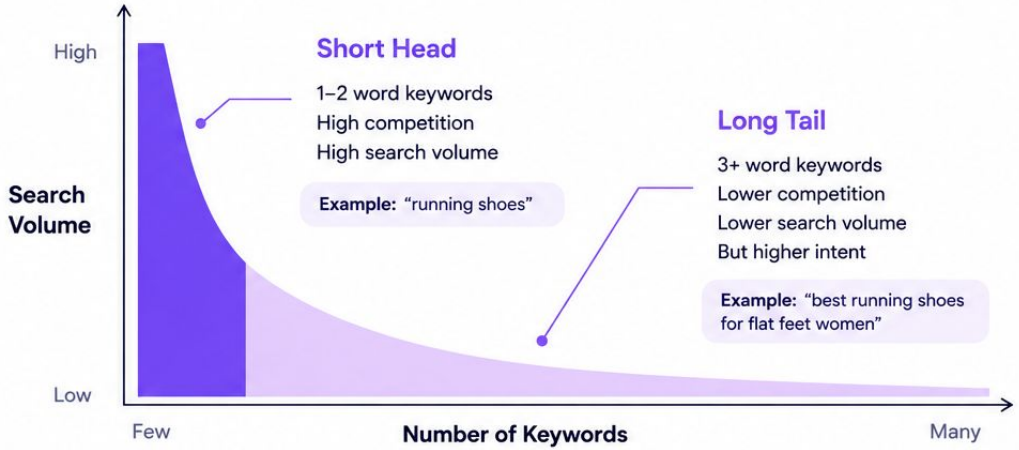

Problem: The majority of users only consult the first page of search results
75% of clicks are made on the top 3 results

Backlinko, Blog du modérateur

The Power of Long Tail

What is Long Tail SEO?

It's the strategy of targeting longer, more specific keyword phrases that have lower search volume but higher intent and less competition.

Key idea

Many small opportunities = big results.

The long tail brings in highly qualified traffic that is more likely to convert.

Examples

Short Head (Broad)	Long Tail (Specific)
running shoes	best running shoes for marathon training
coffee	organic fair trade coffee beans
digital camera	best beginner digital camera for travel

Why it matters

Less competition
Easier to rank on Google

Higher intent
More qualified traffic

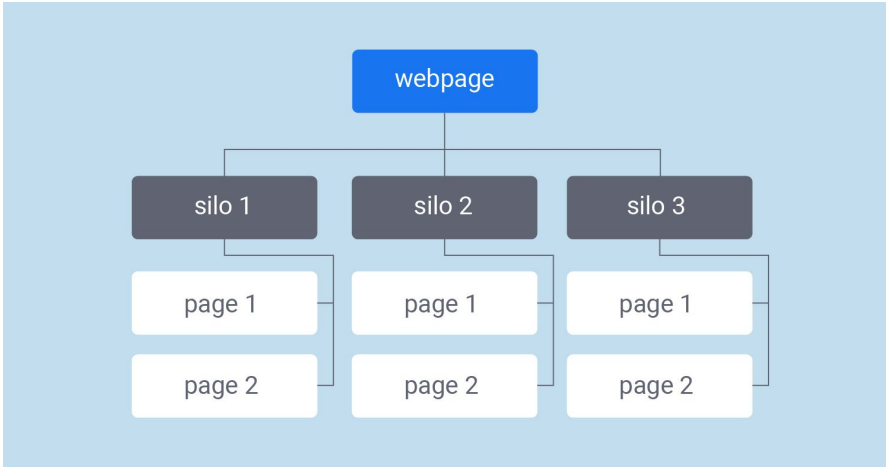

More opportunities
Thousands of long-tail keywords to target

Better conversions
Users know what they want

Bottom line: Don't just go for the big keywords. | Win the long tail. Build authority. Grow sustainably.

Content Structure

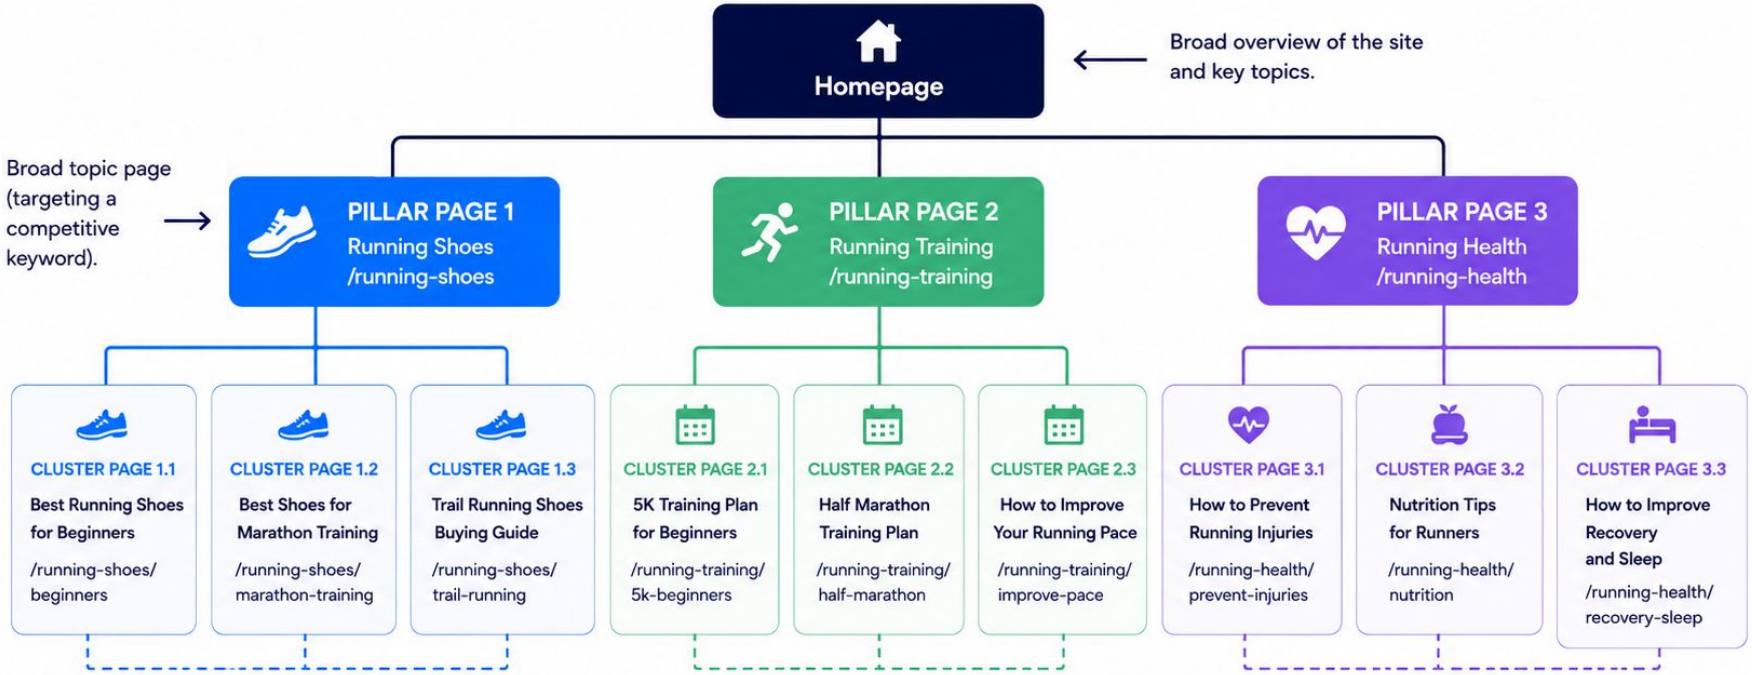

- 1 site per language (never mix languages!)
  www.mysite.com/fr, www.mysite.com/en, …
- Structure the site by theme/category: “silo”

sitechecher

> Easy to navigate, links between pages of the same theme (related content and hyperlinks)

Example: Website about Running

Strong internal links (between pillars and clusters)

Internal links (within each silo/cluster)

- Silo 1: Running Shoes
- Silo 2: Running Training
- Silo 3: Running Health

BENEFITS OF SILO STRUCTURE

- Helps search engines understand your site and content
- Builds topical authority for each subject area
- Improves rankings and user experience

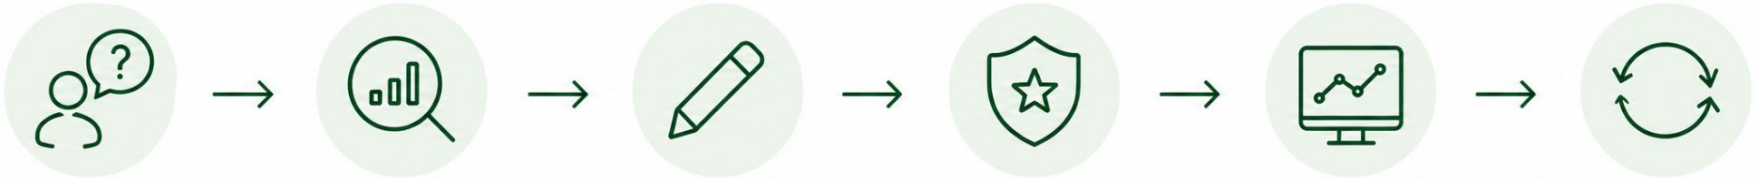

Content Creation: Best Practices

- **Start with search intent**, not keywords.
- **Target one primary keyword** and a few naturally related terms.
- **Write clear, original, and helpful content.**
- **Structure content** with headings (H1, H2, H3), short paragraphs, and white space.
- **Use bullet points and numbered lists** to improve readability.
- **Answer common user questions** (FAQs, “People Also Ask”).
- **Include visual content** (images, infographics, videos) where it adds value.
- **Build trust** with reviews, testimonials, case studies, or expert sources.
- **Regularly update content** to keep it accurate and relevant.
- **Optimize for mobile users** and fast loading times.

Commun Mistakes

- **Duplicate content** → Use canonical tags when multiple pages cover the same content.
- **Targeting irrelevant keywords** → Attracts unqualified traffic that is unlikely to convert.
- **Mixing unrelated topics on the same page** → Weakens topical relevance and confuses both users and search engines.
- **Keyword stuffing** → Write naturally for users, not algorithms.
- **Poor user experience** → Slow pages, intrusive pop-ups, or poor mobile usability hurt both SEO and conversions.
- **Weak internal linking** → Makes it harder for users and search engines to understand your site’s structure.

Modern SEO

1

UNDERSTAND USER INTENT

What is the user looking for?

2

RESEARCH TOPICS & SEARCH BEHAVIOR

Identify relevant topics, questions and keywords behind the intent.

3

CREATE HELPFUL, AUTHORITATIVE CONTENT

Answer the question better than anyone else.
Be original. Be useful.

4

BUILD TOPICAL AUTHORITY

Organize content in clusters.
Link internally.
Cover topics in depth.

5

OPTIMIZE, MEASURE & IMPROVE

Track performance, learn from data and continuously improve.

6

KEEP CONTENT FRESH & RELEVANT

Update regularly to stay accurate and valuable over time.

SEO and AI

HOW AI IS CHANGING SEO

- Search is more conversational.
- Intent over keywords.
- Quality, original and expert content matters more.
- Visibility goes beyond Google (AI assistants, social, marketplaces).

WHAT STAYS THE SAME

- Understand user intent.
- Create helpful content.
- Build topical authority.
- Deliver a great user experience.

OPPORTUNITIES WITH AI

- Faster research (topics, keywords, insights).
- Content ideas & outlines.
- Content creation & optimization.
- Automated SEO audits.
- Save time, focus on strategy and creativity.

RISKS TO WATCH

- Generic AI-generated content.
- Errors and hallucinations.
- Duplicate or low-value content.
- Loss of originality.
- Lower trust and credibility.

THE FUTURE

Search Everywhere Optimization

Be discoverable wherever your audience searches.

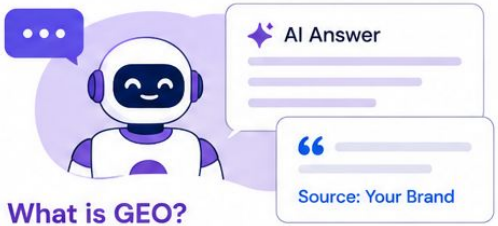

Google ChatGPT YouTube

TikTok Amazon Maps ...

KEY TAKEAWAY: Use AI as your assistant, not your replacement. Combine the power of AI with human expertise to create content that informs, helps and builds trust.

GEO (Generative Engine Optimization)

What is GEO?

Generative Engine Optimization (GEO) is the practice of optimizing content so it is more likely to be used, cited, or recommended by AI-powered search engines and assistants.

Unlike traditional SEO, GEO focuses on **being the answer**, not just ranking in search results.

	SEO	GEO
	Optimizes for search engines	Optimizes for AI assistants
	Goal: **Rank** on search results	Goal: Be **cited** or **recommended**
	Focus on **keywords**	Focus on clear, authoritative **answers**
	Clicks to a website	AI-generated **responses**

BEST PRACTICES FOR GEO

Write clear, concise answers

Answer user questions directly and simply.

Create high-quality, trustworthy content

Provide original, accurate and valuable information.

Structure information with headings and FAQs

Use clear formatting so AI can easily understand your content.

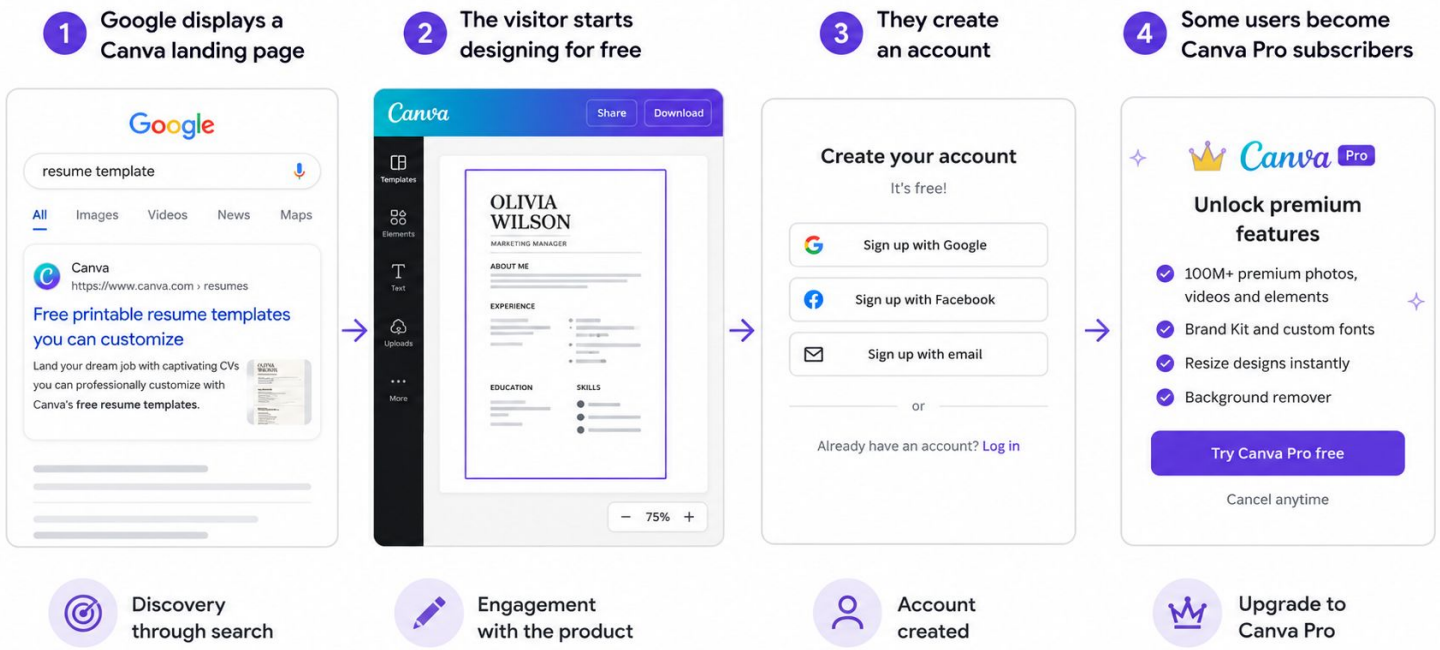

Demonstrate expertise and credibility (E-E-A-T)

Show experience, expertise, authoritativeness and trustworthiness.

Keep content accurate and up to date

AI favors fresh and reliable information.

Case Study: How Canva Uses SEO to Acquire Millions of Users

Mini Exercise

A startup launches an online platform for learning Italian. For each search query, decide:

1. Would you target it?

2. Why? Is it an Informational or Commercial query?

- Learn Italian online
- Italian grammar exercises
- Best language learning app
- Italy travel guide
- Duolingo alternatives
- How long does it take to learn Italian?

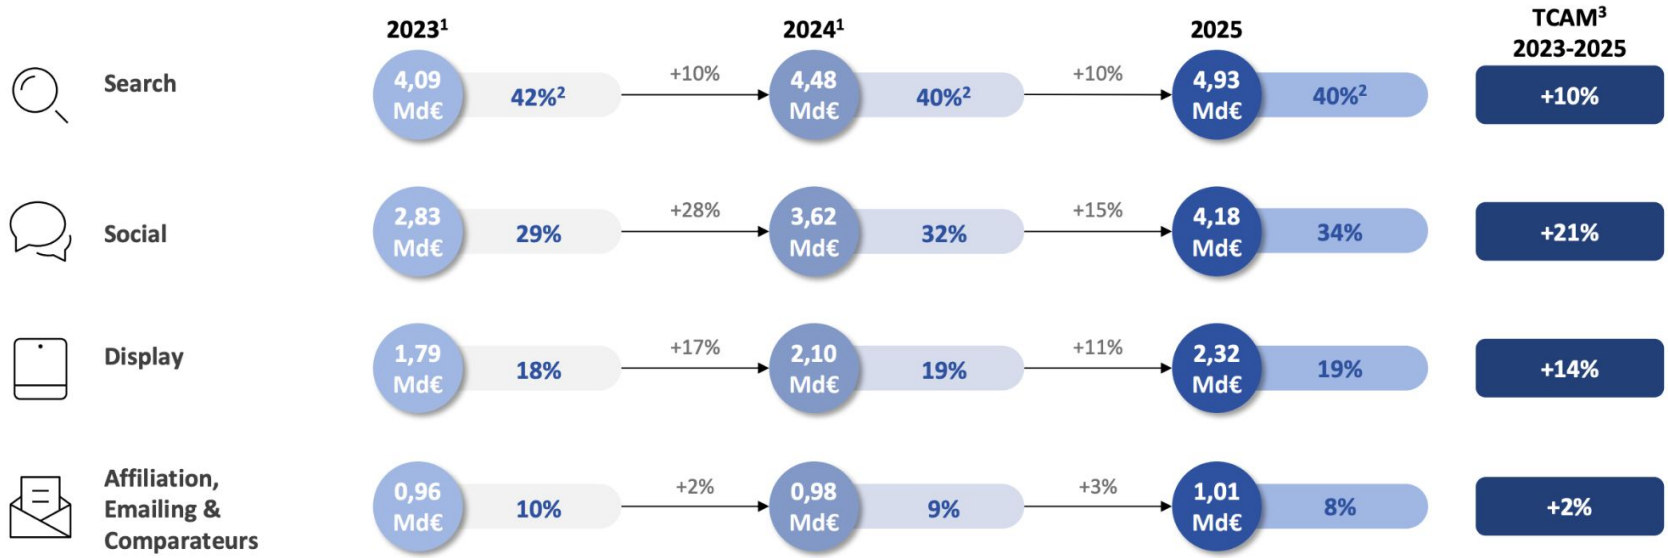

04

Paid

Acquisition - SEA

Growth Driven by Paid Channels (France)

Progression par grands leviers et poids dans le marché
France, recettes en Md€, par levier, 2023-2025

1. Les chiffres relatifs aux années précédentes ont été retraités pour tenir compte des changements de périmètre et de l'atterrissage réel de certains acteurs ; 2. Les poids relatifs sont arrondis à l'entier le plus proche, la somme peut ne pas faire 100% ; 3. Taux de croissance annuel moyen | Sources : SRI, UDECAM, Entretiens réalisés sur la période de janvier-février 2026 avec les acteurs du marché, Informations publiques, Analyse Oliver Wyman

http://www.sri-france.org/

Search Engine Advertising (SEA)

A paid acquisition channel where **advertisers bid to display ads in search engine results**.

Capture users with high purchase intent at the **exact moment** they search.

- Immediate visibility
- Pay-per-click (PPC)
- Keyword targeting
- Measurable performance
- Budget controlled

SEA Algorithm

THE GOOGLE ADS AUCTION

1. **User searches**
   A search is made on Google.
2. **Eligible advertisers enter**
   Ads that match the search enter the auction.
3. **Google calculates Ad Rank**
   Based on several factors.
4. **Ads are ordered**
   Ads are shown in order of their Ad Rank.
5. **User clicks (or doesn't)**
   The best experience for the user is the goal.

AD RANK = BID × QUALITY SCORE + AD ASSETS

Google evaluates every ad using a combination of factors.

1. BID

How much you're willing to pay per click.

2. QUALITY SCORE

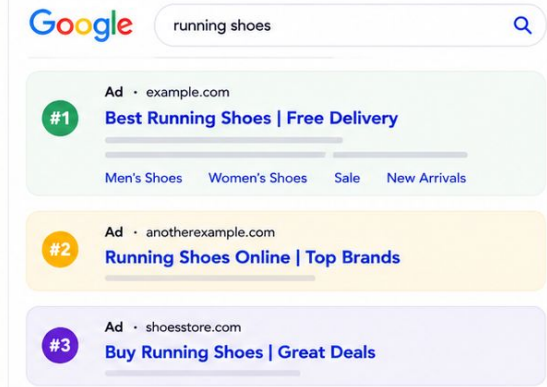

- Ad relevance
- Expected CTR (click-through rate)
- Landing page experience

3. AD ASSETS

- Ad extensions
- Sitelinks
- Callouts
- Images
- Prices
- Promotions

The higher the Ad Rank, the better the position and the more likely your ad is to be seen and clicked.

RESULT: ADS ARE SHOWN IN ORDER OF AD RANK

EXAMPLE

Three advertisers bid on "running shoes"

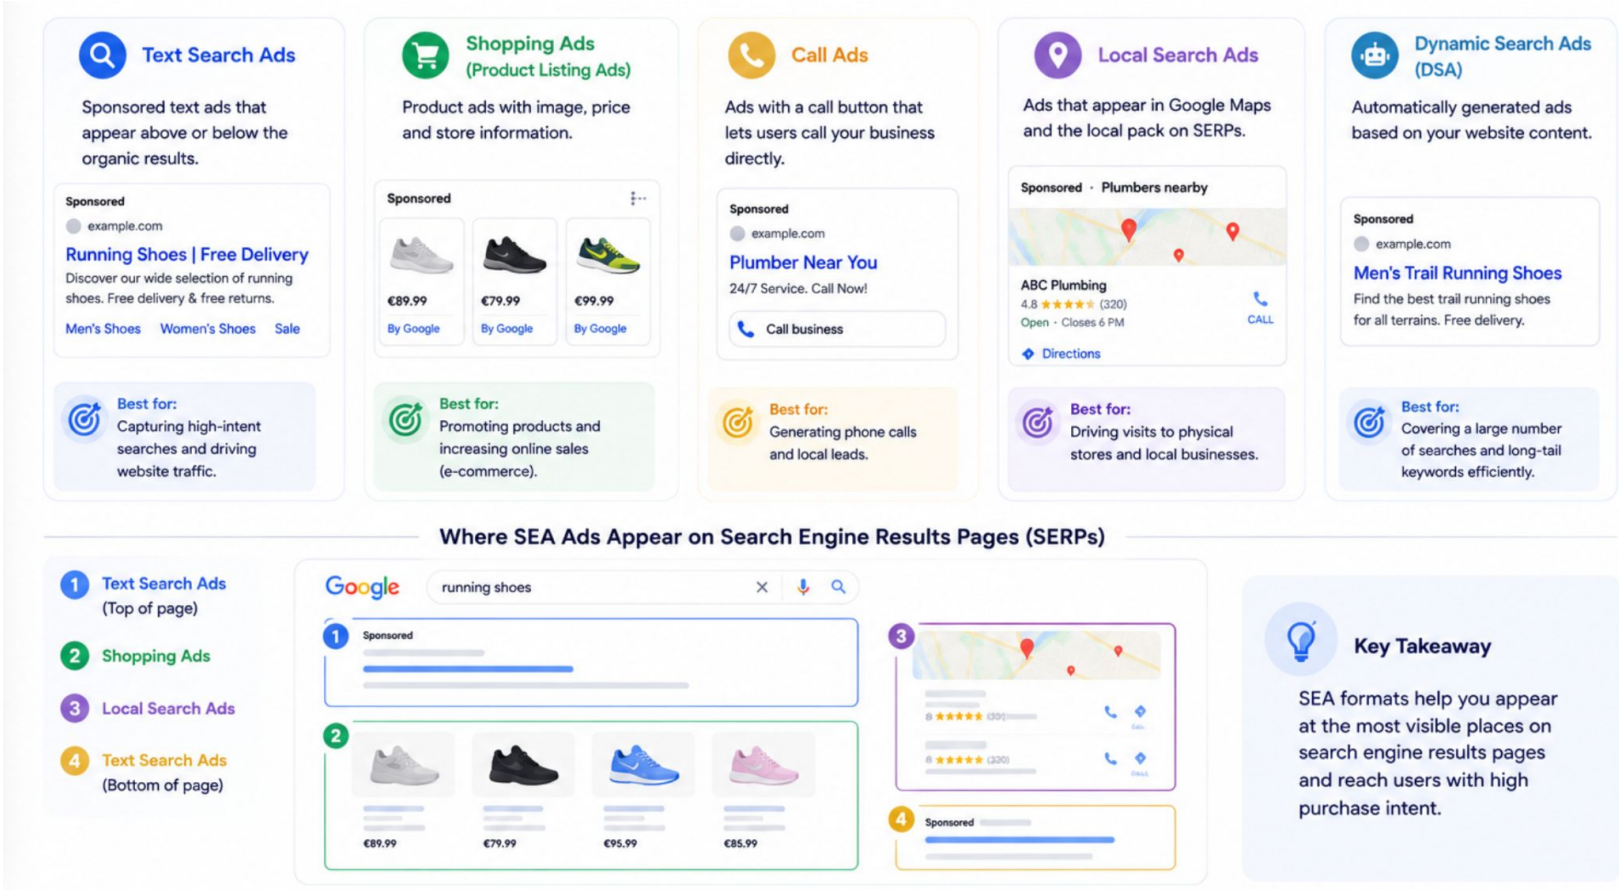

Company	Bid	Quality Score	Likely Rank
A	€5	Low	3
B	€3	High	1
C	€4	Medium	2

A better ad and landing page can outperform a higher bid.

KEY TAKEAWAY:

Google Ads rewards relevance, not just budget.
Improve your Quality Score and ad experience to win better positions for less.

SEA Formats

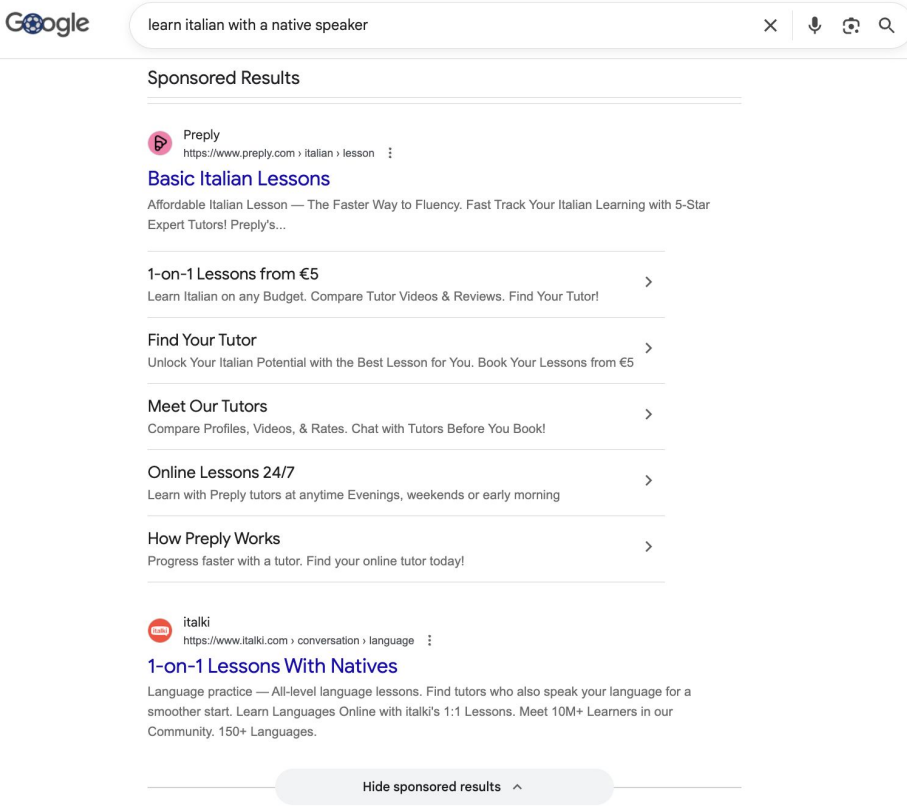

Text Search Ads
Sponsored text ads that appear above or below the organic results.
Sponsored
example.com
Running Shoes | Free Delivery
Discover our wide selection of running shoes. Free delivery & free returns.

Paid

Acquisition - Other

Other Paid Ad Formats

Display Advertising

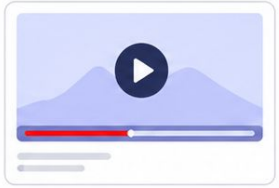

Banner ads across websites and apps.

Best for: Awareness & remarketing

Video Advertising

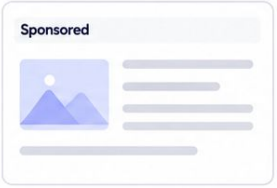

Ads on YouTube and streaming platforms.

Best for: Storytelling & engagement

Native Advertising

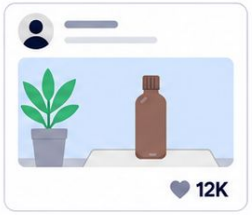

Sponsored content that blends with editorial content.

Best for: Content discovery

Influencer Marketing

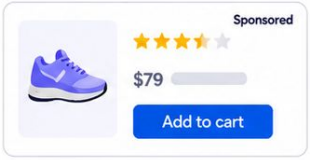

Paid creator partnerships.

Best for: Trust & social proof

Retail Media

Ads on e-commerce platforms.

Best for: Purchase intent

Sponsored Email & Newsletters

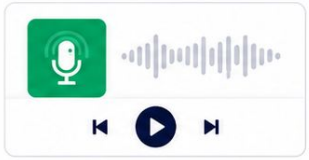

Ads in newsletters and email media.

Best for: Niche audiences

Audio Advertising

Ads on music and podcast platforms.

Best for: Brand awareness

Affiliation

1

Join a program

Affiliates sign up for a brand's affiliate program and get a unique tracking link.

2

Share the link

Affiliates promote the product through their content (social media, blog, email, YouTube, etc.).

3

Customers click

People click on the affiliate link and visit the brand's website.

4

Make a purchase

The customer buys the product (or completes a specific action, like a sign-up).

5

Track the sale

The purchase is tracked through the affiliate link (using cookies or other tracking methods).

6

Earn a commission

The affiliate receives a commission based on the agreed terms (percentage or fixed amount).

Win-win-win

Brands get more sales, affiliates earn income, customers discover useful products.

Common models

- Pay per sale (CPS)
- Pay per lead (CPL)
- Pay per click (CPC)

Popular channels

Blogs, social media, YouTube, newsletters, comparison websites.

Key to success

Relevant audience, trust, and authentic recommendations.

Retargeting

1 User discovers your brand

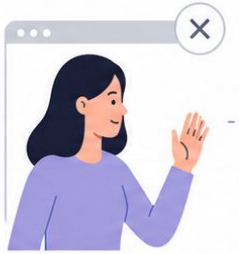

They see your ad or find you on Google, social media, etc.

2 User visits your website

They browse products or services but leave without converting.

3 User leaves

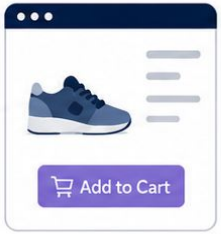

No purchase or signup happens.

4 We retarget across multiple channels

We show personalized ads or messages to remind them of what they saw.

5 User returns

They come back to your website.

6 Conversion

They complete the desired action (purchase, signup, booking, etc.).

RETARGETING CHANNELS

Display Ads

Banner ads on websites and apps your audience visits.

Social Media Ads

Personalized ads on platforms like Facebook, Instagram, TikTok, LinkedIn.

Search Retargeting

Show ads when users search again on Google or other search engines.

Email Retargeting

Send personalized emails like cart reminders, product reminders, or special offers.

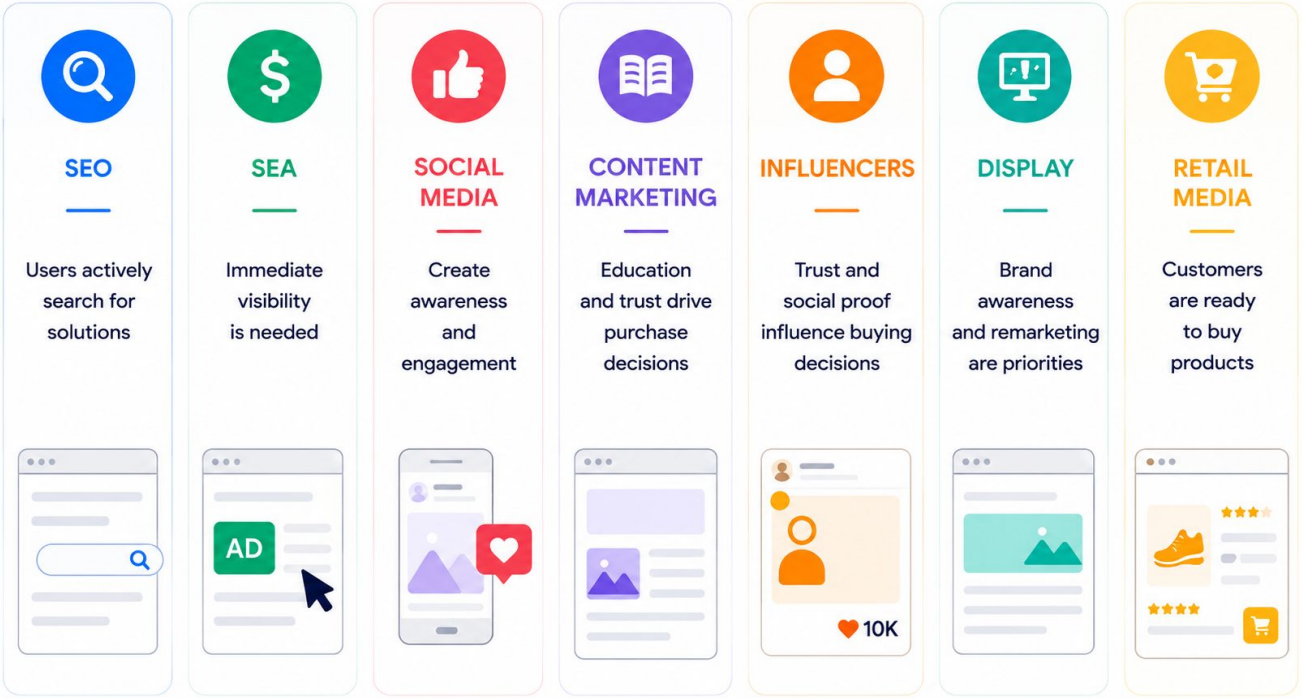

07 Channel *Fit*

Channel Fit

Business Goal -> Customer Intent -> Channel Fit -> Acquire

(what is your audience looking for?)

Case Study: Booking.com

Should Booking.com invest equally in every acquisition channel?

- SEO + Content Marketing
- SEA
- Social Media
- Influencers
- Display Ads (Display Retargeting)

Booking.com

CASE STUDY
Channel Fit in Action

Booking.com uses the right channels at the right time to attract, engage and convert travelers around the world.

THE TRAVELER JOURNEY & CHANNEL ROLE

GOAL: More Bookings

CHANNEL FIT ANALYSIS

CHANNEL	PRIMARY ROLE	FIT (1–5)	WHY IT FITS
SEO	Capture demand	5 ★★★★★	Users actively search for accommodation options.
SEA / Google Ads	Capture demand	5 ★★★★★	Captures high-intent searches with immediate results.
Google Hotel Ads	Capture demand & comparison	5 ★★★★★	Prominent placement for travelers comparing prices and options.
Content Marketing	Create demand & educate	4 ★★★★☆	Travel guides inspire and attract future travelers.
Social Media	Inspire & engage	2 ★★☆☆☆	Great for inspiration, but low intent to book directly.
Influencers	Inspire & build awareness	3 ★★★☆☆	Effective for destination awareness and trust.
Display Retargeting	Re-engage & convert	5 ★★★★★	Reminds interested users and brings them back to complete the booking.

HOW CHANNELS WORK TOGETHER

KEY TAKEAWAY

Booking.com doesn't rely on a single channel.
It combines multiple channels, each with a specific role, to reach travelers at every stage of their journey.

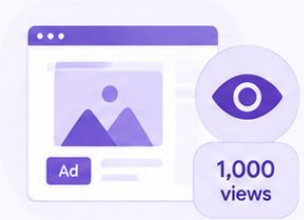

08
Metrics

Payment Models

CPM

Cost Per Thousand Impressions

You pay for visibility.

You pay a fixed price for every 1,000 times your ad is shown (impressions).

Cost = (Impressions ÷ 1,000) × CPM

When to use

Brand awareness, reach, launching a new product.

Keep in mind

You pay even if people don't click.

CPC

Cost Per Click

You pay for traffic.

You pay each time someone clicks on your ad.

Cost = Number of Clicks × CPC

When to use

Drive traffic to your website, product page or landing page.

Keep in mind

You pay for clicks, not for actual purchases or results.

CPA

Cost Per Acquisition

You pay for results.

You pay only when a specific action is completed (e.g. a purchase, sign-up, or lead).

Cost = Number of Conversions × CPA

When to use

Drive sales, leads or sign-ups. Focus on measurable results.

Keep in mind

Usually higher cost per action, and requires good tracking.

Is your growth profitable?

CAC = Marketing & Sales Costs ÷ Number of New Customers

Example:
Marketing budget: €10,000
New customers: 200
➡️ CAC = €50 per customer

Customer Lifetime Value (LTV)
The total revenue (or profit) generated by a customer over their relationship with the business.

Example:
Value = €250

✅ LTV > CAC ➡️ Profitable
❌ CAC > LTV ➡️ Unsustainable

Mini Exercise

A SaaS company spends **€24,000** on digital marketing.

It acquires **300 new customers**.

Each customer generates **€360** in lifetime revenue.

Questions

1. What is the CAC?
2. Is the business profitable?
3. How could the company improve profitability?

Metrics

VANITY METRICS

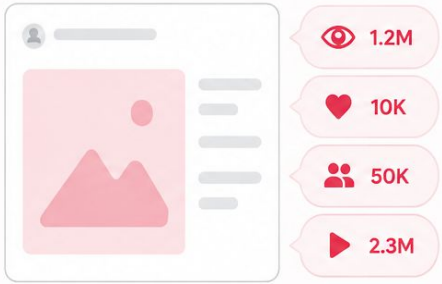

Easy to measure. Hard to impact business.

IMPRESSIONS
Many saw it, but did they care?

LIKES
Nice to have, but not revenue.

FOLLOWERS
More doesn't always mean better.

VIEWS
Watched, but no action.

Looks good...

But what's the impact?

METRICS THAT MATTER

Harder to get. Drive real business results.

CLICK-THROTHROUGH RATE (CTR)
Shows interest and relevance.

CONVERSION RATE
Turns interest into action.

CUSTOMERS ACQUIRED
The engine of growth.

REVENUE & LTV
The ultimate business impact.

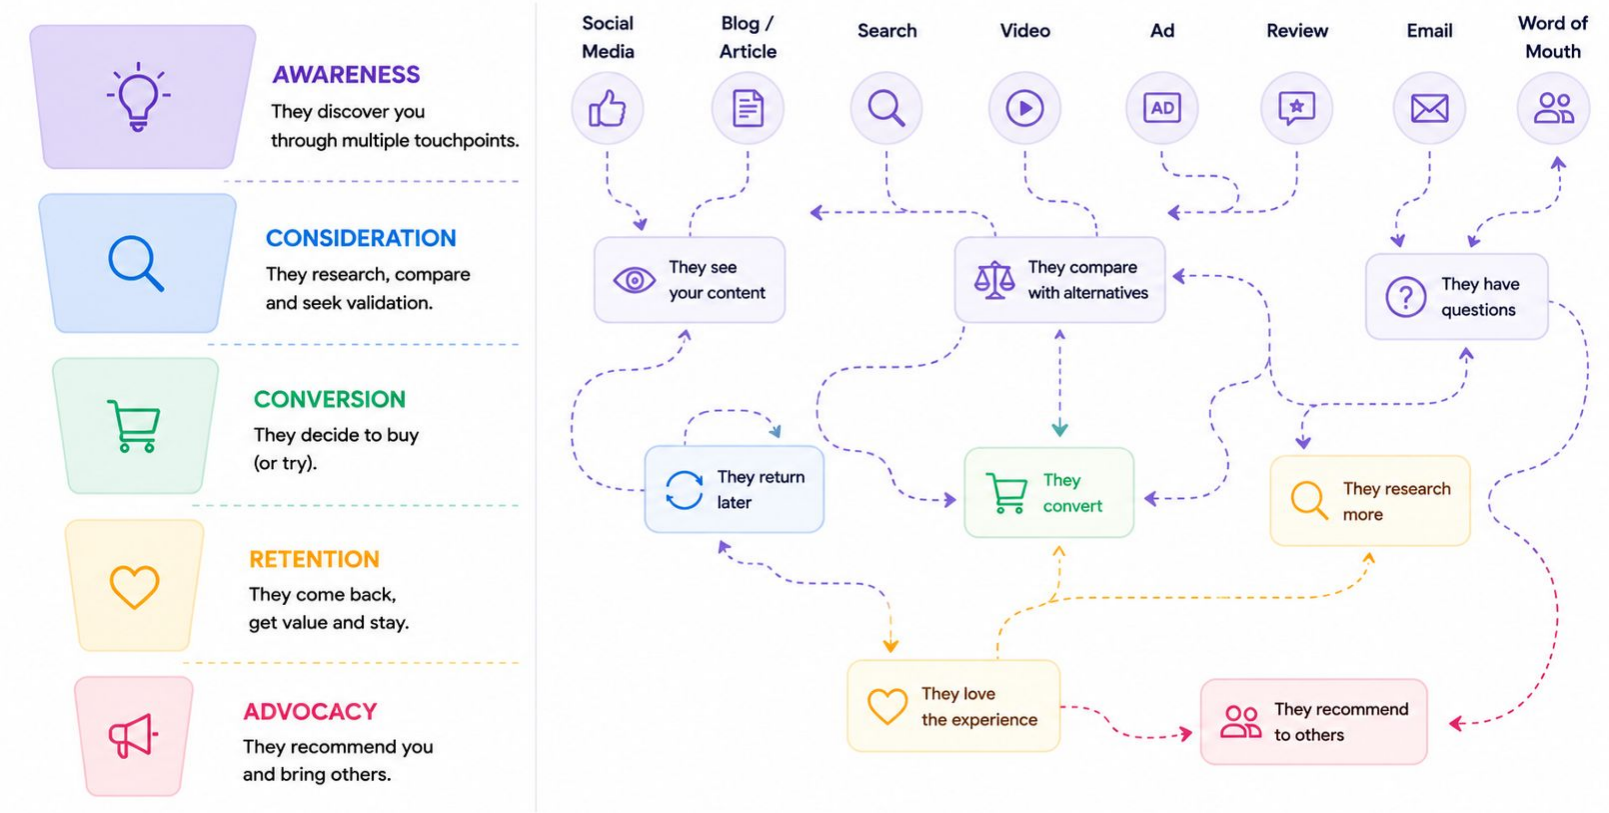

DRIVES GROWTH & PROFITABILITY

08
Conclusion

The Modern Funnel is not Linear

Case Study: Decathlon

DECATHLON

Scenario

A customer wants to buy a pair of hiking shoes.

Question

Did the customer follow a traditional funnel?

THE REAL CUSTOMER JOURNEY (NOT LINEAR)

1. Sees an Instagram reel of a hiking adventure

2. Visits Decathlon website to explore hiking shoes

3. Leaves without buying

4. Watches YouTube reviews and tests

5. Searches on Google "best hiking shoes"

6. Reads comparison articles and blogs

7. Visits Decathlon website again

8. Goes to a physical Decathlon store to try the shoes

9. Doesn't buy yet

10. Receives a promotional email a few days later

11. Returns to the website and adds to cart

12. Purchases online

TRADITIONAL FUNNEL (Linear)

KEY TAKEAWAY

Customers don't move step by step.

They explore, compare, leave, return, and switch between channels before making a decision.

Every touchpoint matters.

Key Takeaways

01

Know your audience

Target the right people with the right message in the right places.

02

Diversify your channels

Use a mix of channels (SEO, Ads, Social, Content, Partnerships, Referral, Influencers).

03

Focus on quality, not just volume

High-intent traffic converts better than high-volume traffic.

04

Align acquisition with user intent

Make sure your promise in the ad matches the experience on your site.

05

Track, measure and optimize

Monitor performance by channel and continuously optimize what works.

06

Think long-term relationships

Acquisition is the start. Great experiences turn users into loyal advocates.

Smart acquisition brings the right people in.

Clear messaging, relevant channels, and continuous optimization drive sustainable growth.

Thanks!

Does anyone have any questions?
