Digital Marketing Strategy 3

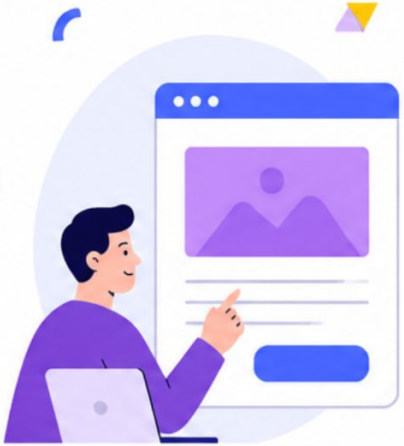

M2 - Inalco

Acquire → Convert → Retain → Grow

Attract the right people to your brand.

Turn visitors into customers.

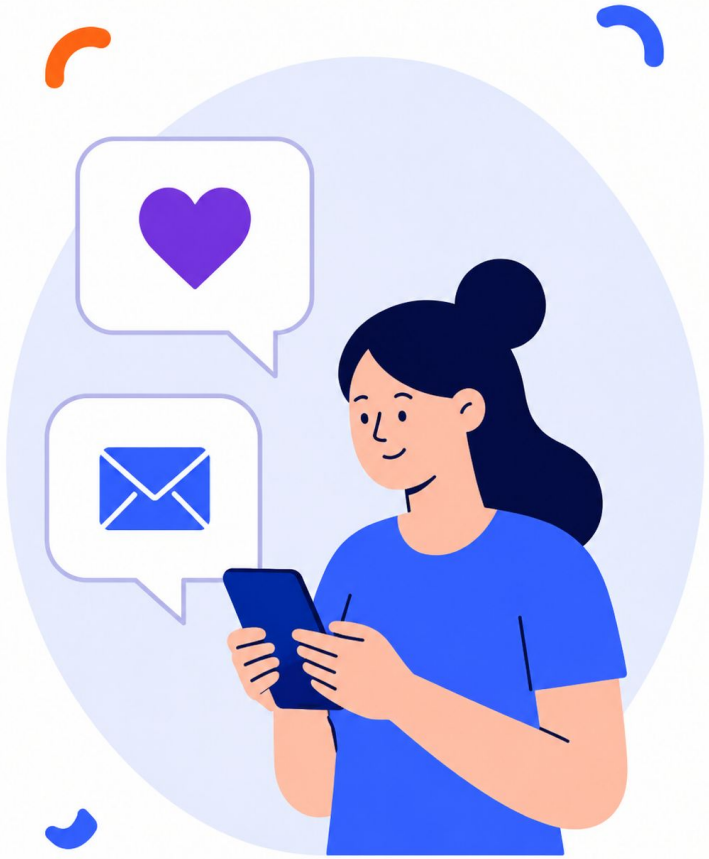

Build relationships and keep customers coming back.

Increase value, get referrals, and scale sustainably.

Data, CRM, Retention, Growth

After this session you will be able to

- Understand the **role of CRM** in digital marketing
- Identify opportunities to **improve customer retention**
- Design **automated customer journeys** and **lifecycle campaigns**
- **Measure retention** using key CRM and loyalty metrics
- **Build growth strategies** that maximize customer lifetime value

Which is usually cheaper?

Acquiring a new customer or retaining an existing customer?

POWERED BY

DATA
Collect reliable data across all touchpoints.

INSIGHTS
Analyze behavior and performance.

AUTOMATION
Deliver the right message at the right time.

PERSONALIZATION
Make every customer feel understood.

TRUST
Build trust through value, transparency and consistency.

A CONTINUOUS CYCLE OF IMPROVEMENT

Better experiences → Stronger relationships → Sustainable growth

01
CRM

CRM = Customer Relationship Management

CRM Definition: CRM is the strategy and technology used to build, manage, and strengthen relationships with customers throughout their lifecycle.

CRM helps organizations manage:

Customer Data

- Contact details
- Preferences
- Purchase history

Interactions

- Website visits
- Emails & calls
- Chats & social media

Communication

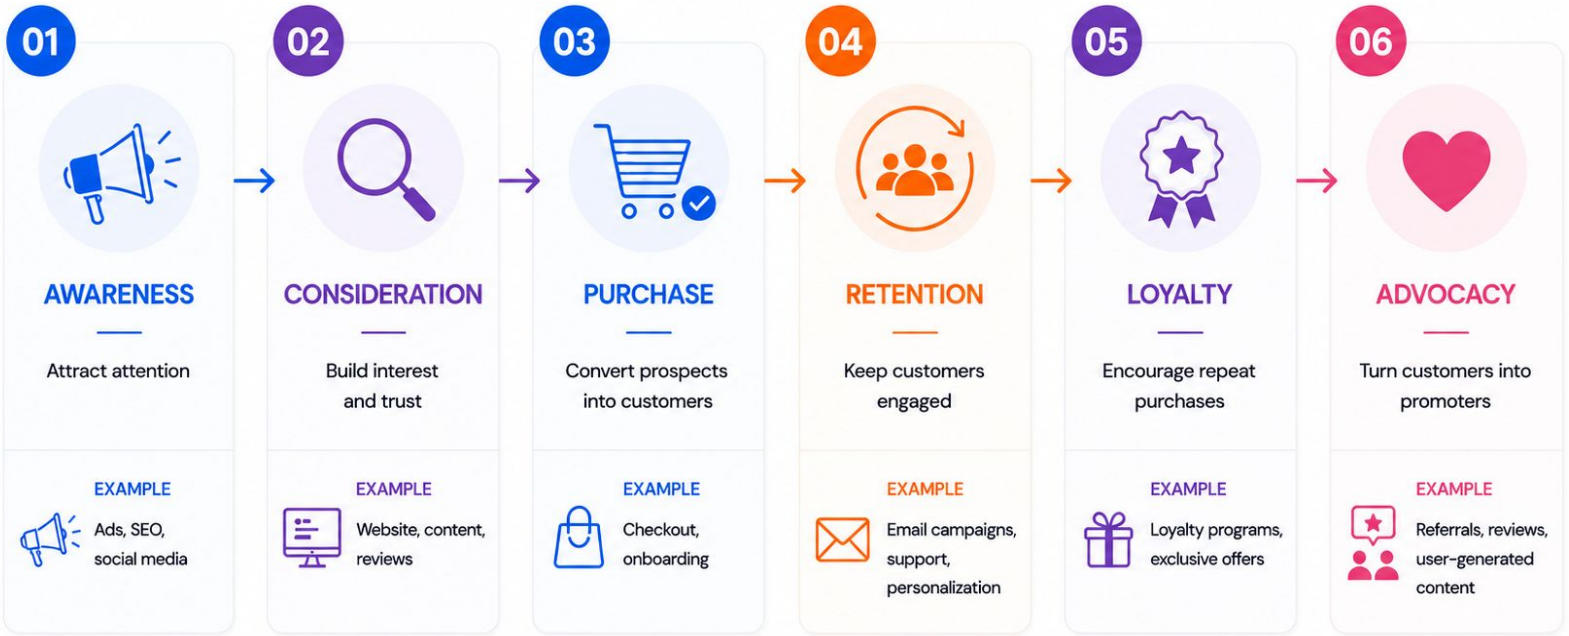

- Personalized messages
- Targeted campaigns
- Automated notifications

Customer Lifecycle

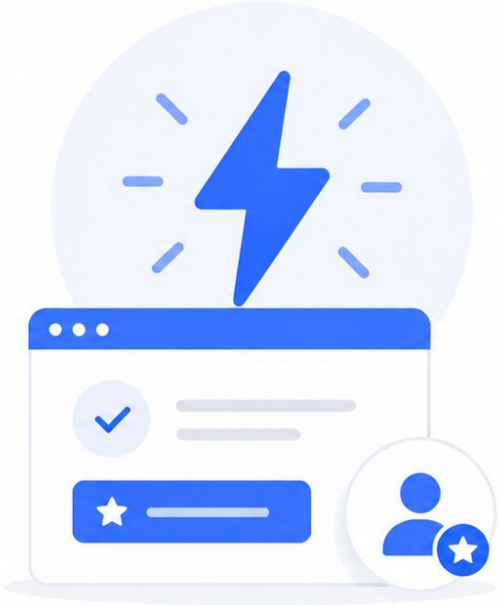

- Acquisition
- Conversion
- Retention
- Loyalty
- Advocacy

The Customer Lifecycle

The customer relation doesn't end after the purchase, it begins there.
Each stage offers opportunities to build **stronger relationships** and **increase customer value**.

Activation

Activation =
the user experiences
product value.

It's the first moment when users understand how your product helps them solve a problem or achieve a goal.

When users activate, they are more likely to:

- Return
- Engage
- Upgrade
- Recommend

Activation

Identify **the moment** when the user first experiences real value (Activation).

Spotify
Activation Moment...

Airbnb
Activation Moment...

Duolingo
Activation Moment...

Uber
Activation Moment...

Canva
Activation Moment...

ChatGPT
Activation Moment...

Mini Case: Dropbox

Problem: Many users created an account but never returned.

Question: Which action should Dropbox encourage to increase Activation?

Mini Case: Dropbox

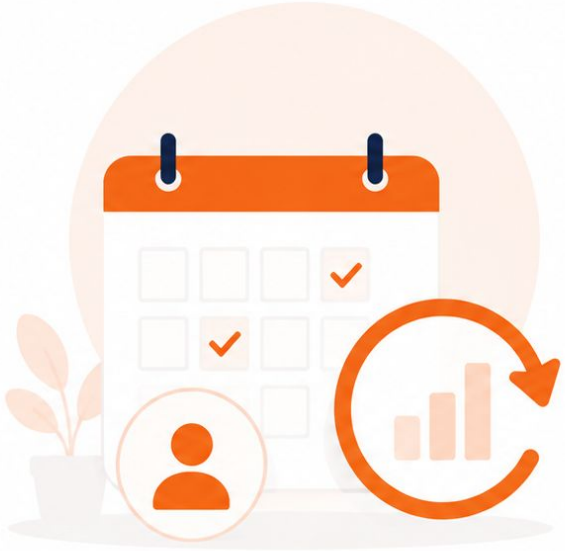

Problem: Many users created an account but never returned.

Question: Which action should Dropbox encourage to increase Activation?

Answer: Dropbox should guide new users to upload their first file and share it with someone.
Why? It demonstrates Dropbox's core value: easy file storage and sharing and gives users a reason to come back.

Retention

Retention = users continue returning over time.

It's the ability to keep customers engaged and coming back because they get ongoing value from your product.

When users stay, your business grows.

- Higher Lifetime Value
- Lower Acquisition Costs
- Stronger Relationships
- More Referrals & Advocacy

Case Study: Netflix

Which strategies help Netflix improve customer retention?

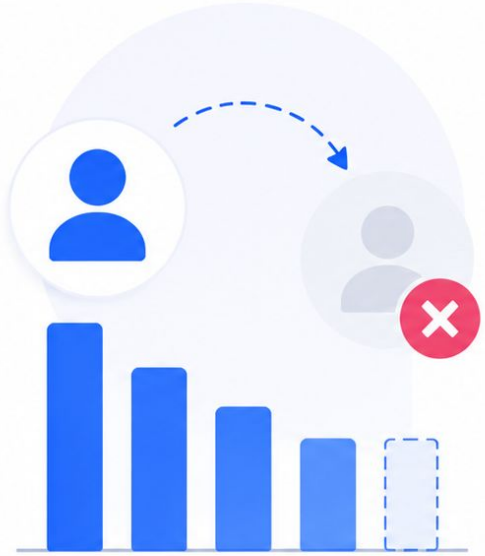

Case Study: Netflix

Which strategies help Netflix improve customer retention?

- Personalized recommendations
- High-quality original content
- Automatic “Continue Watching”
- Easy cancellation
- Reminder emails
- Personalized notifications

Churn

Churn =
customers stop using your product.

Churn is the percentage of customers who stop using your product or service during a given period.

- **Increases** acquisition costs
- **Reduces** lifetime value
- **Decreases** recurring revenue
- **Slows down** business growth

Churn: Why Customers Churn

- Poor user experience
- Low perceived value
- Better competitor
- High price
- Lack of engagement
- Poor customer support

Churn Rate Formula

Churn Rate Formula

$$\text{Churn Rate} = \frac{\text{Customers Lost}}{\text{Customers at the Beginning of the Period}} \times 100$$

EXAMPLE

Customers at the Beginning of the Period: 1,000

÷

Customers Lost: 80

×

100

=

Churn Rate: 8%

Mini Case: Acquire More or Reduce Churn?

A company has **1,000 customers** and a budget of **€1,000**. It can choose **only one** strategy.

Option A – Acquisition

- Customer Acquisition Cost (CAC): **€20**
- Budget: **€1,000**

➡️ **50 new customers** acquired

Customers at the end of the month = ?

Option B – Retention

- Improve onboarding and customer support
- Cost: **€1,000**
- **80 customers who would have left decide to stay**

Customers at the end of the month = ?

Mini Case: Acquire More or Reduce Churn?

Option A

1,000 + 50 = **1,050 customers**

Option B

1,000 customers + **80 retained customers**

= **1,080 customers**

Customer Segmentation

Customer Segmentation is the process of **dividing customers into groups with similar characteristics, needs, or behaviors**.
The goal is to deliver **more relevant and personalized** marketing.

Personalization

Personalization is the practice of tailoring content, products, or experiences to individual customers based on their data, preferences, and behavior.

Product Recommendations

"You may also like…"

Personalized Emails

Name, interests, abandoned cart

Content Recommendations

Netflix, Spotify, YouTube

Website Experience

- Recently viewed items
- Personalized homepage

Benefits

- Higher engagement
- Better customer experience
- Increased conversion rates
- Higher customer loyalty

Mini Exercise

An online bookstore wants to increase sales. Match a profile with the most relevant message.

CUSTOMER PROFILES		TARGET MESSAGES	
Emma	Buys children’s books every month	**A**	**“Complete your purchase and get free shipping.”**
Lucas	Recently searched for travel guides	**B**	**“We found three new mystery novels we think you’ll love.”**
Sofia	Frequently buys mystery novels	**C**	**“New children’s books have just arrived for your little readers.”**
David	Left a book in his shopping cart yesterday	**D**	**“Top 10 travel guides for your next trip.”**

Case Study: Netflix

CHALLENGE

Thousands of movies and TV shows.

How can every user quickly find something they'll enjoy?

CUSTOMER DATA

- Viewing history
- Search history
- Ratings
- Watch duration
- Similar users
- Genres, actors, language, device, time of day, etc.

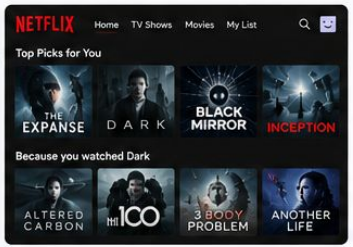

AI RECOMMENDATION ENGINE

Advanced algorithms analyze data and predict what each user is most likely to enjoy.

PERSONALIZED EXPERIENCE

USER A

Loves sci-fi and thrillers

USER B

Loves romance, dramas and comedies

RESULT

80%

of what users watch comes from recommendations.*

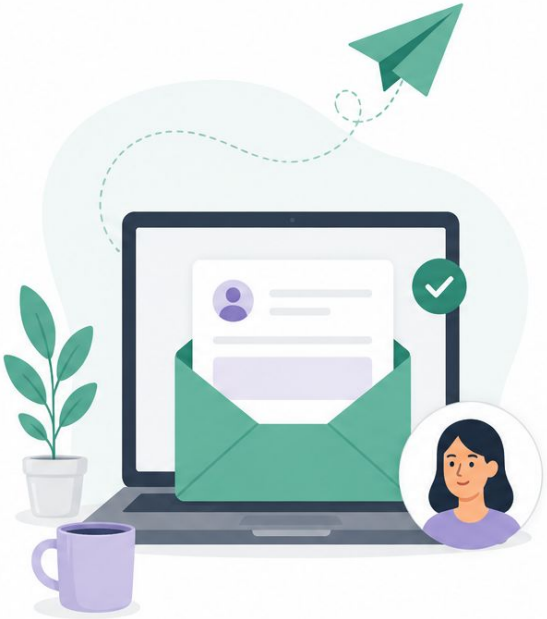

More interactions → more data → smarter recommendations

BUSINESS IMPACT

- Improves content discovery
- Increases engagement and watch time
- Encourages continued viewing
- Enhances user experience and loyalty

Email Marketing

Direct Channel
Reach customers directly in their inbox.

Owned Audience
Your email list belongs to your business.

High ROI
One of the highest-return marketing channels.

Lifecycle Communication
Send the right message at every stage.

Welcome → Purchase → Loyalty → Win-back

Right message • Right customer • Right time

Email Marketing - Customer Lifecycle

1 Emma

Created an account yesterday but has never purchased.

2 Lucas

Added running shoes to his cart but didn't complete the purchase.

3 Sofia

Regular customer who has bought five times this year.

4 David

Hasn't opened any emails or purchased anything in the last six months.

B Welcome!

Here's how to get started and discover our best-selling products.

C You left something behind!

Your running shoes are still waiting for you.

A Thank you for being a loyal customer!

Enjoy 20% off your next order.

D We miss you!

Here's a special offer to welcome you back.

Marketing Automation

Marketing automation uses software to automatically send **personalized messages based on customer actions or predefined rules.**

It helps businesses communicate with customers **at the right moment, without manual work.**

Examples:

- Welcome email after sign-up
- Abandoned cart reminder
- Birthday email
- Product recommendation after purchase
- Re-engagement campaign after inactivity

Delivery Rate and Sender Score

Delivery Rate

Measures how many emails successfully reach recipients.

Formula

Delivery Rate = Delivered Emails ÷ Sent Emails × 100

Example

10,000 emails sent → 9,700 delivered

=> Delivery Rate = 97%

Sender Score

A broader indicator of how healthy your email delivery is.

It can consider:

- Delivery rate
- Bounce rate
- Spam complaints
- Sender reputation
- Authentication (SPF, DKIM, DMARC)

=> Higher score = healthier email program

Protect Your Sender Reputation

1. Separate email streams

Use distinct sender identities for different email types

- Marketing campaigns
- Transactional emails
- Customer service
- Automated lifecycle emails

→ Helps isolate reputation and makes communication clearer.

2. Make unsubscribing easy

One-click unsubscribe

- Clear “Unsubscribe” link
- No login required
- Respect preferences immediately

→ Fewer spam complaints.

3. Send to engaged contacts

Prioritize active subscribers

- Remove invalid addresses
- Suppress repeated bounces
- Re-engage inactive users
- Stop sending to people who never engage

4. Control sending frequency

Avoid over-mailing

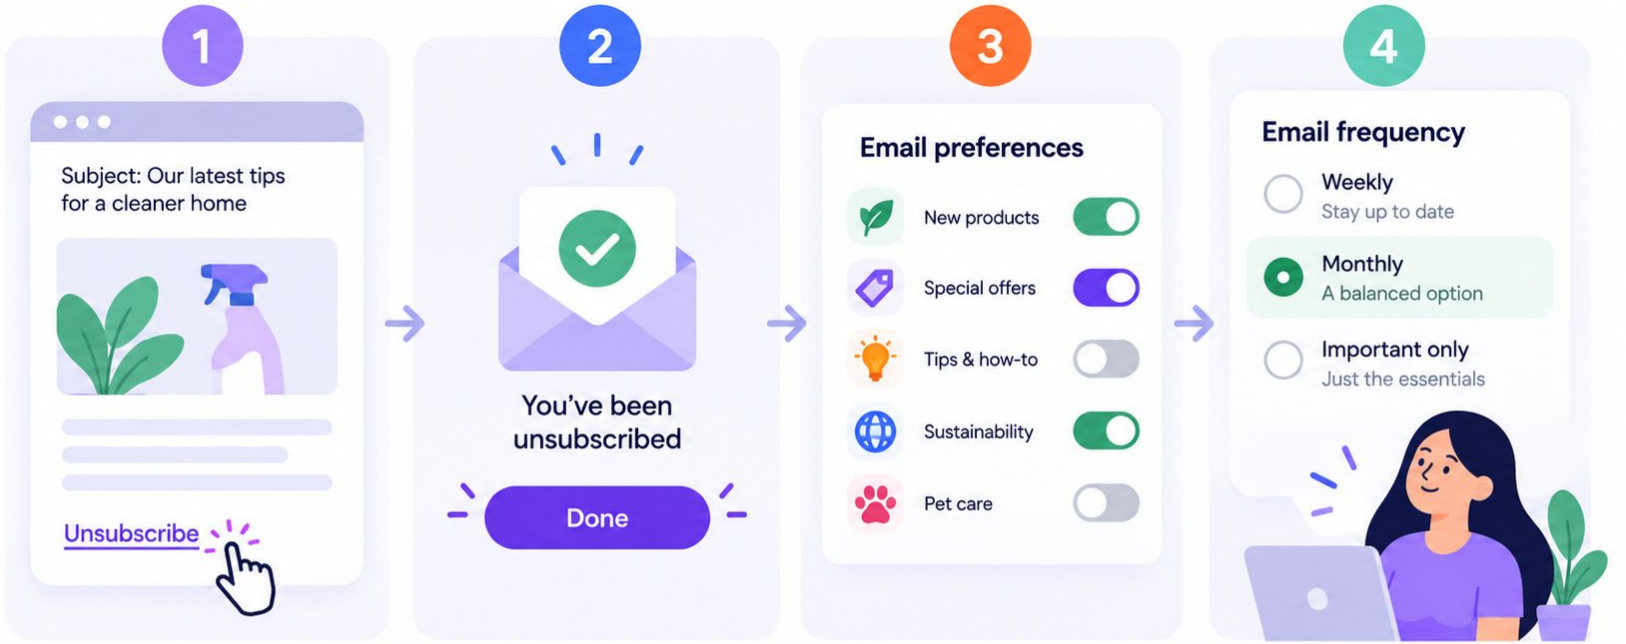

- Set clear frequency expectations
- Let users choose what they receive
- Avoid sudden spikes in volume

5. Authenticate & monitor

Build technical trust

- SPF
- DKIM
- DMARC
- Monitor bounces, spam complaints and engagement

Make Unsubscribing Easy

02
Growth

Growth vs Growth Hacking

Growth (System Thinking)

System Thinking
Take a holistic view of the business.

Retention Focused
Build loyalty and maximize lifetime value.

Long-term Value
Invest in durable growth and strong relationships.

=> Build a sustainable growth system.

Growth Hacking

Rapid Experimentation
Test ideas quickly and iterate.

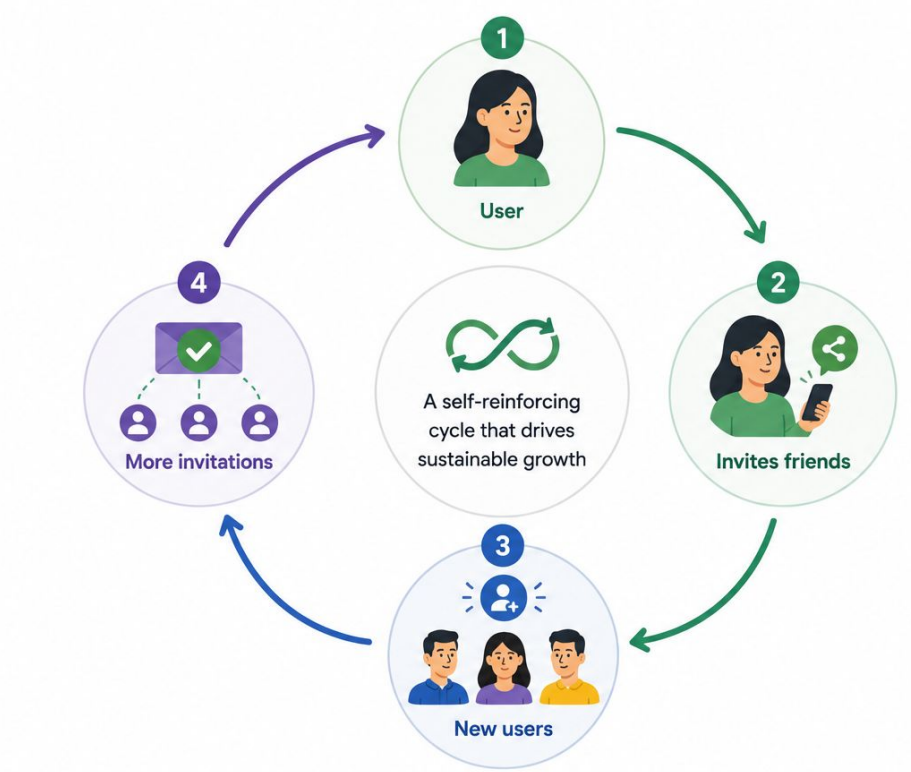

Short-term Tactics
Use quick wins to drive immediate growth.

Fast Optimization
Optimize metrics and scale what works.

=> Growth hacking

Growth Loops

A growth loop is a self-reinforcing system in which **each new user helps generate more users,** creating continuous and sustainable growth.

Referral Systems

A referral system encourages existing customers to invite new users by offering rewards or incentives to one or both participants. It transforms satisfied customers into **brand advocates.**

Invite a Friend

Share a referral link with friends.

Referral Credits

Earn store credit or discounts for successful referrals.

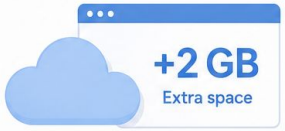

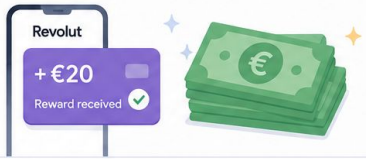

Bonus Systems

Reward both the referrer and the new customer (“Give €10, Get €10”).

Benefits

- Lower customer acquisition cost (CAC)
- Higher trust through word-of-mouth
- Scalable customer acquisition
- Increased customer loyalty

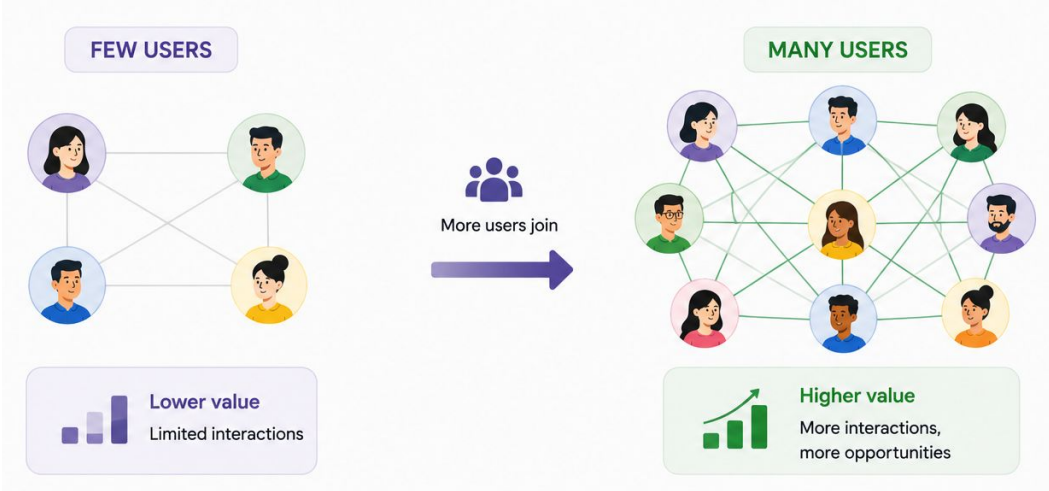

Referral Systems

COMPANY	REFERRAL REWARD
Dropbox	 Extra cloud storage
Uber	 Ride credits
Airbnb	 Travel credits
Revolut	 Cash reward for successful referrals

Network Effect

A network effect occurs when a product or **service becomes more valuable as more people use it**.

Each new user increases the value of the network for existing users, **creating a self-reinforcing cycle of growth**.

EXAMPLES

WhatsApp
More friends join → more people to chat with.

LinkedIn
More professionals join → more connections and opportunities.

Airbnb
More hosts attract more guests. More guests encourage more hosts to join.

eBay
More buyers attract more sellers. More sellers attract more buyers.

Reviews, Ratings and Word of the Mouth

93%

of consumers have made a purchase after reading online reviews*.

They provide **social proof**, helping potential customers make purchasing decisions.

Build Trust

Customers trust other customers.

Influence Purchase Decisions

Positive reviews increase confidence and conversions.

Improve Visibility

More reviews can improve rankings on marketplaces and search engines.

Provide Valuable Feedback

Businesses learn what customers like and what needs improvement.

** Source: BrightLocal, Local Consumer Review Survey 2026*

Best Practices

- Ask satisfied customers for reviews.
- Respond to both positive and negative reviews.
- Make leaving a review simple.
- Use feedback to improve products and services.

Mini Exercise

A customer leaves the following review on Google:

⭐☆☆☆☆

“I waited 40 minutes for my order. The staff was unfriendly, and the food was cold. Very disappointing.”

How would you react?

North Star Metric

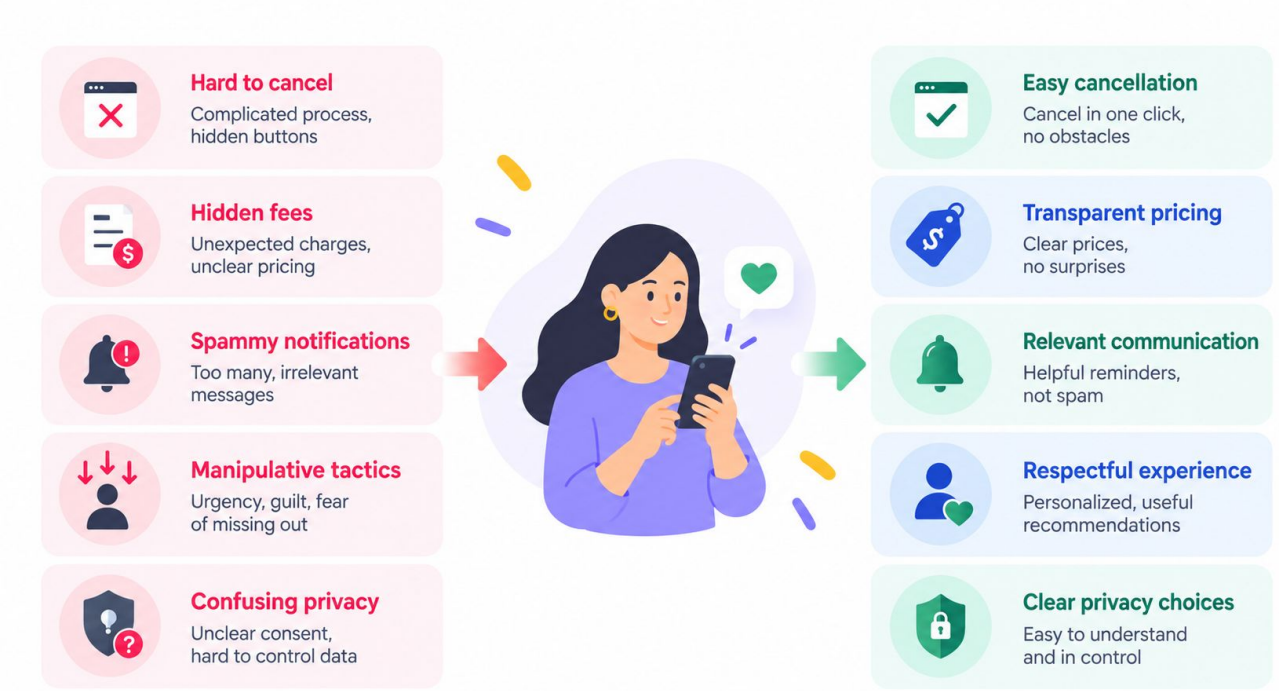

A **North Star Metric (NSM)** is the **single most important metric** that reflects the value a company delivers to its customers.

Company	North Star Metric
Spotify	Listening hours
airbnb	Nights booked
NETFLIX	Hours watched
facebook	Daily Active Users (DAU)
Uber	Completed trips
duolingo	Daily Active Learners

Ethics and Retention

Ethical retention means encouraging customers to stay because they **receive real value**, not because they are manipulated or trapped.

03

Key *Takeaways*

Key Takeaways

Focus on value

Solve real needs.
Deliver consistent value.

Build relationships

Use CRM and automation.
Right message, right time.

Earn trust

Be transparent and respectful. Trust drives loyalty.

Communicate smartly

Emails, notifications and reminders that are relevant and helpful.

Leverage social proof

Reviews, referrals and network effects turn customers into advocates.

Stay data-driven

Track the right metrics and make decisions based on insights.

Thanks!

Does anyone have any questions?
