Digital Marketing Strategy 4

M2 - Inalco

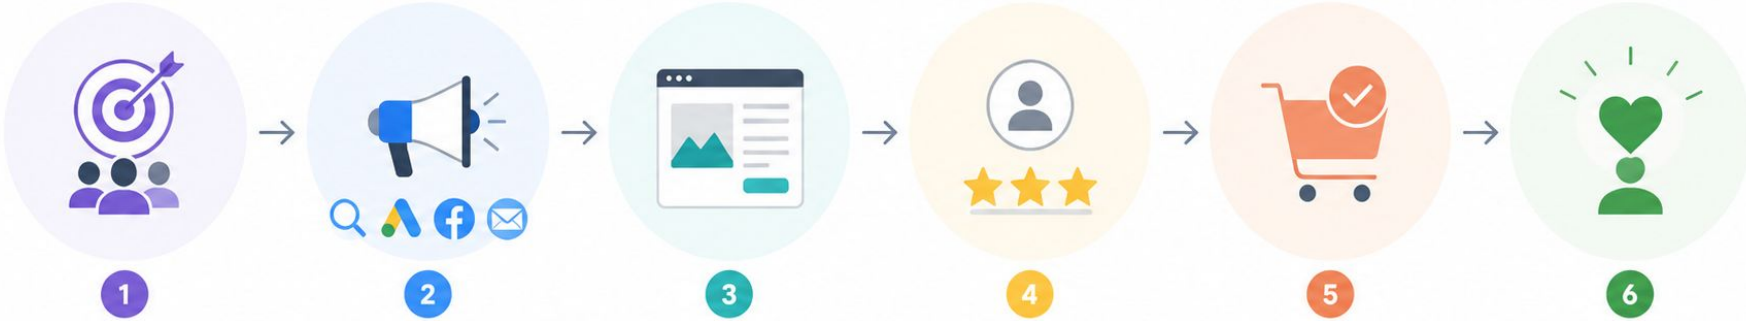

01

Digital Marketing *System*

Customer Acquisition

1

Target Audience

Identify and understand the right people

2

Traffic Acquisition

SEO, SEA, Social Media, Email, Content, Ads

3

Website / Landing Page

Create relevant and engaging pages

4

User Experience (UX)

Make the experience clear, fast and enjoyable

5

Conversion Optimization (CRO)

Remove friction and encourage action

6

Customer

Turn visitors into loyal customers

Right people

Attract your ideal audience

Quality traffic

Drive relevant visitors to your site

Better experience

Engage and guide visitors effectively

Higher conversions

Turn more visitors into customers

Measure & improve

Track results and optimize continuously

ACQUISITION

Bring the right people in.

Know your audience

Target the right people with the right message in the right places.

Diversify your channels

Use a mix of SEO, Paid Ads, Social Media, Content, Partnerships, Referral, Influencers.

Focus on quality, not just volume

High-intent traffic converts better than high-volume traffic.

Align acquisition with user intent

Make sure your promise in the ad matches the experience on your site.

Track, measure and optimize

Monitor performance by channel and continuously optimize what works.

UX (EXPERIENCE)

Make every experience effortless.

Design for clarity

Users should instantly understand what you offer and what to do next.

Keep it simple

Remove unnecessary elements and reduce cognitive load.

Be consistent

Use familiar patterns and maintain a consistent experience.

Provide feedback

Keep users informed with clear responses and system status.

Design for everyone

Ensure accessibility, speed and inclusive experiences.

Build trust

Use social proof, transparency and security to build confidence.

CONVERSION

Turn intent into action.

Communicate clear value

A strong value proposition quickly answers: what, for whom, and why.

Guide users to take action

Use one clear, visible, and compelling call-to-action.

Build trust and reduce doubt

Use reviews, testimonials, guarantees and trust signals.

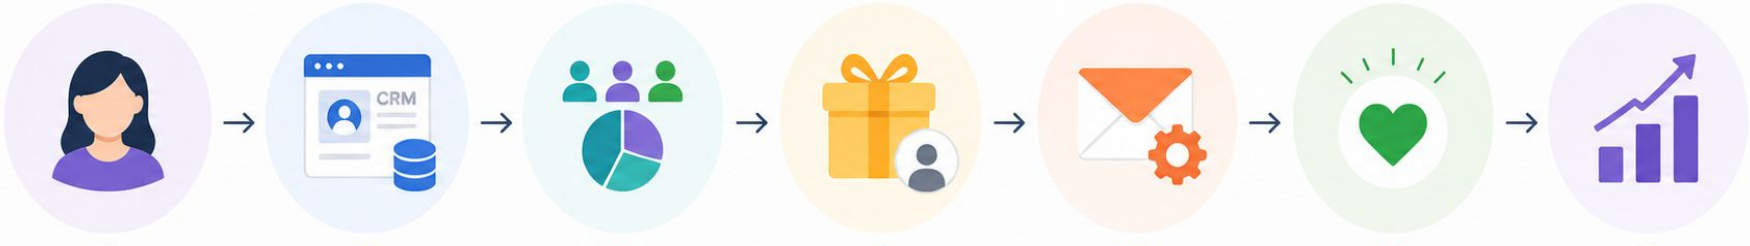

Remove friction

Simplify forms, reduce steps, and eliminate distractions.

Optimize through experimentation

Test, learn, and iterate to improve conversion rates continuously.

CRM & Customer Retention

1 **Customer**
Attract new customers

2 **CRM**
Centralize customer data and interactions

3 **Segmentation**
Group customers by needs and behavior

4 **Personalization**
Deliver relevant offers and content

5 **Automation**
Automate the right messages at the right time

6 **Retention**
Build loyalty and increase satisfaction

7 **Growth**
Increase CLV and drive referrals

Know your customers
Understand who they are and what they need

One source of truth
All customer data in one place

Target with relevance
Send the right message to the right people

Make it personal
Create experiences that matter

Communicate automatically
Save time and stay consistent

Build loyalty
Happy customers stay and come back

Turn customers into advocates
Drive growth through loyalty and referrals

02

Data Driven *Marketing*

Data-Driven Marketing - Why Data Matters

Data-driven marketing uses customer data to **make more informed marketing decisions** instead of relying on assumptions**.**

1 Customer Interactions

Every click, view, purchase, message and visit generates data.

2 Customer Data

All interactions are collected and organized in one place.

3 Marketing Insights

Data is analyzed to uncover patterns, trends and opportunities.

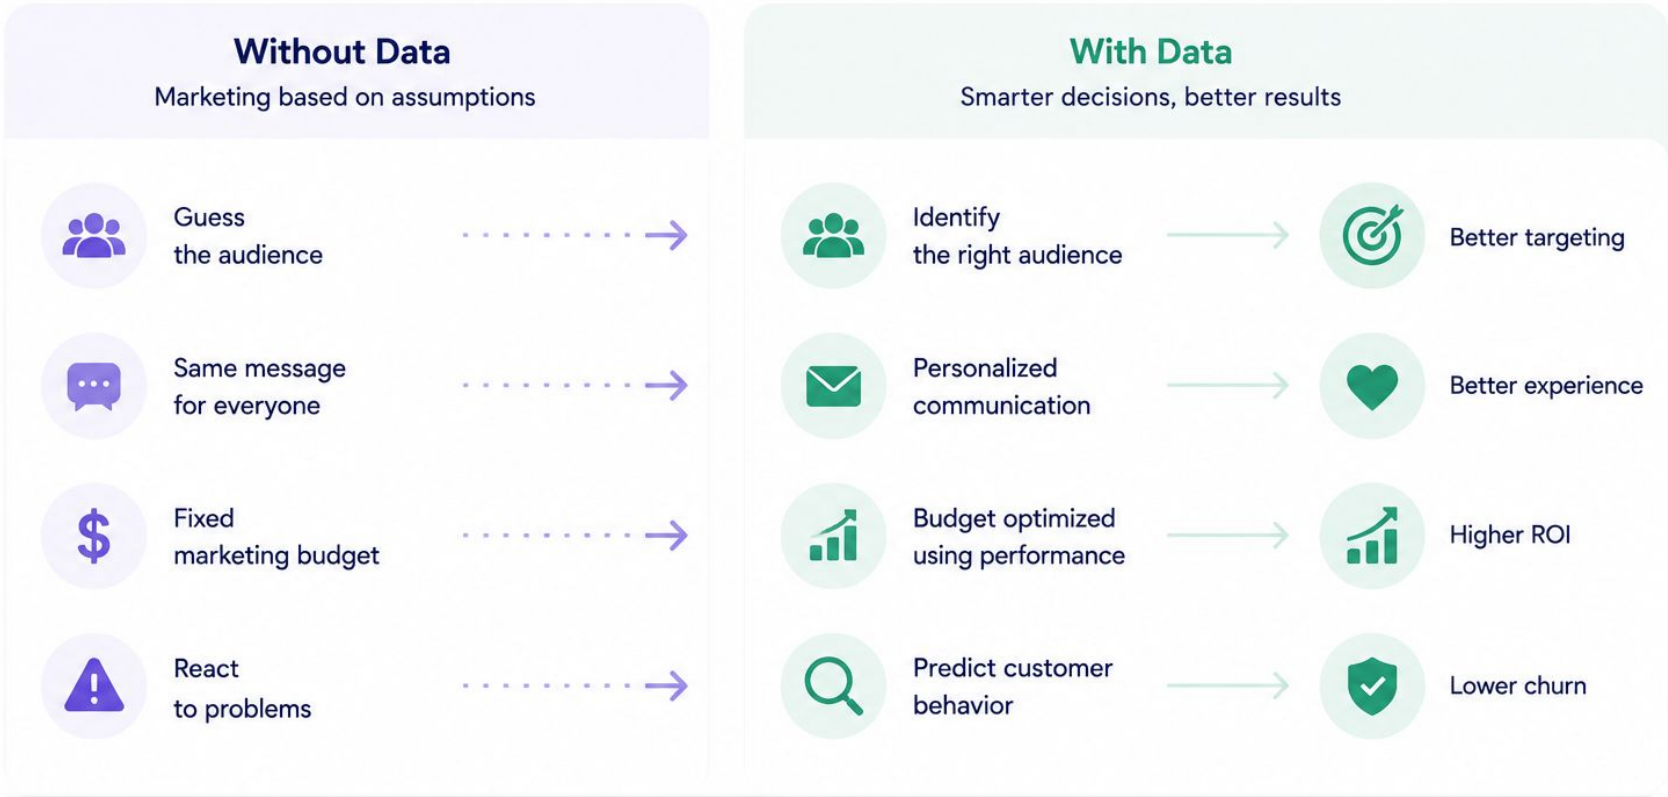

4 Smarter Decisions

Insights help marketers choose the right actions and prioritize efforts.

5 Better Results

Better decisions lead to stronger performance and growth.

Data-Driven Marketing - Why Data Matters

Customer Data

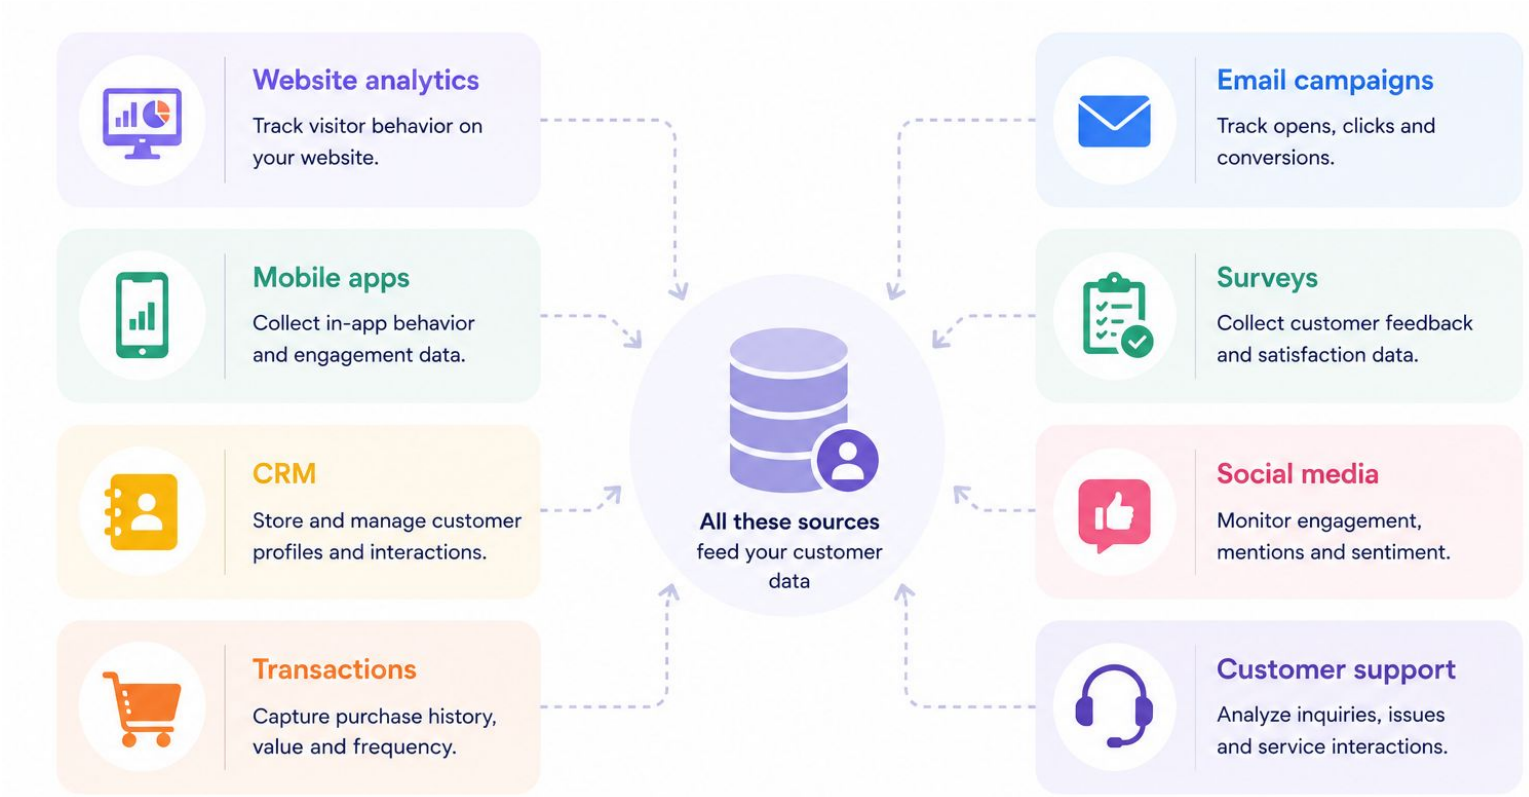

Customer data is the information a company collects to better **understand its customers and support marketing decisions**.

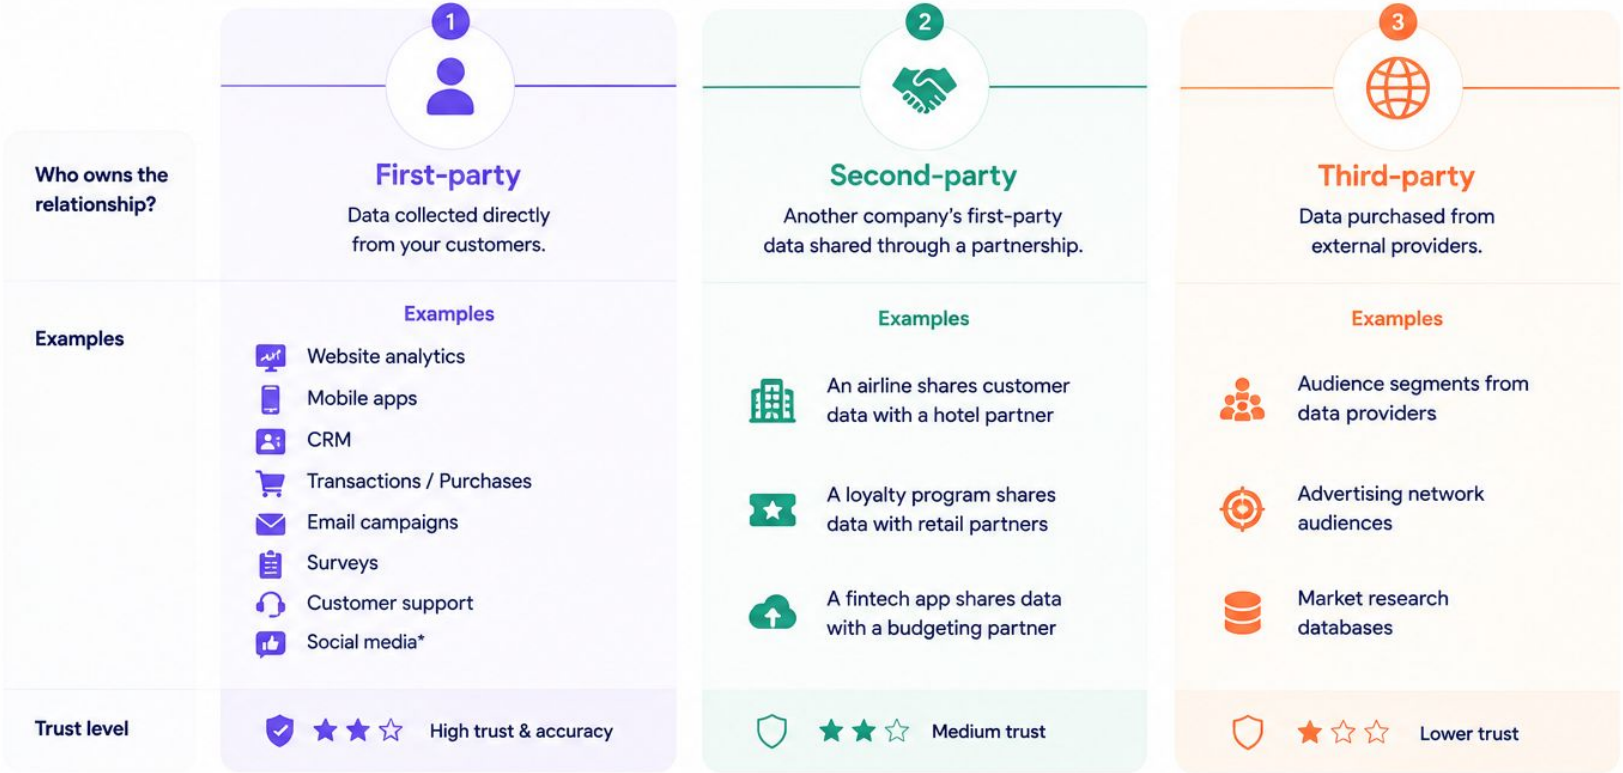

Data Sources

Customer date comes from **many touchpoints**. The more relevant data you collect, the better you can understand and serve your customers

First-, Second-, and Third-Party Data

First-party data is becoming the most valuable source of customer insights because it is accurate, privacy-friendly, and collected directly from customers.

Data-Driven Approach

Ethics & Privacy

1

GDPR

The GDPR protects personal data and gives individuals more control over their information.

- Lawful, fair and transparent processing
- Data minimization
- Right of access and portability
- Right to be forgotten

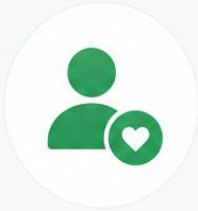

2

Consent

Collect data only with clear, specific and informed consent.

- Freely given
- Informed
- Specific
- Easy to withdraw

3

Responsible Data Use

Use data ethically and securely to create value for customers and your business.

- Protect data security
- Avoid bias and discrimination
- Use data for legitimate purposes only
- Limit access to those who need it

4

Transparency

Be open about how data is collected, used and shared.

- Clear privacy notices
- Communicate data use in simple language
- Be honest and accountable
- Build trust with your customers

Consent Principles

01

Freely given

No pressure or forced consent.
→ **Real choice**

02

Specific

Consent for a clear, defined purpose.
→ **One purpose ≠ all purposes**

03

Informed

People know what they are agreeing to.
→ **Who, why, and how**

04

Unambiguous

A clear affirmative action is required.
→ **No pre-ticked boxes**

05

Easy to withdraw

Withdrawing consent should be as easy as giving it.
→ **Clear opt-out**

Consent BC2 vs B2B

B2C

Consent is required before sending marketing emails.

Strong focus on **individual privacy**.

Customers can **withdraw consent at any time**.

B2B

Rules are often more flexible for professional contacts

Communication must still be **relevant and respectful**.

Opt-out mechanisms should always be available.

Opt-in

GOOD OPT-IN

Clear, specific and informed consent.

- Specific purpose explained
- Freely given (no pre-checked box)
- Easy to understand
- Respects user control

☐ Yes, I would like to receive the newsletter and I agree to the processing of my personal data for this purpose.

You can unsubscribe at any time via the link in our emails.

Subscribe

BAD OPT-IN

Unclear, broad and not truly informed.

- Vague purpose
- Pre-checked box (not free)
- Too much information at once
- Hard to withdraw consent

Cookie & Analytical Consent

Cookies Overview

Small files stored on a user's device to remember or measure activity.

Essential cookies

- Needed for the website to work
- Usually no consent required

Analytics cookies

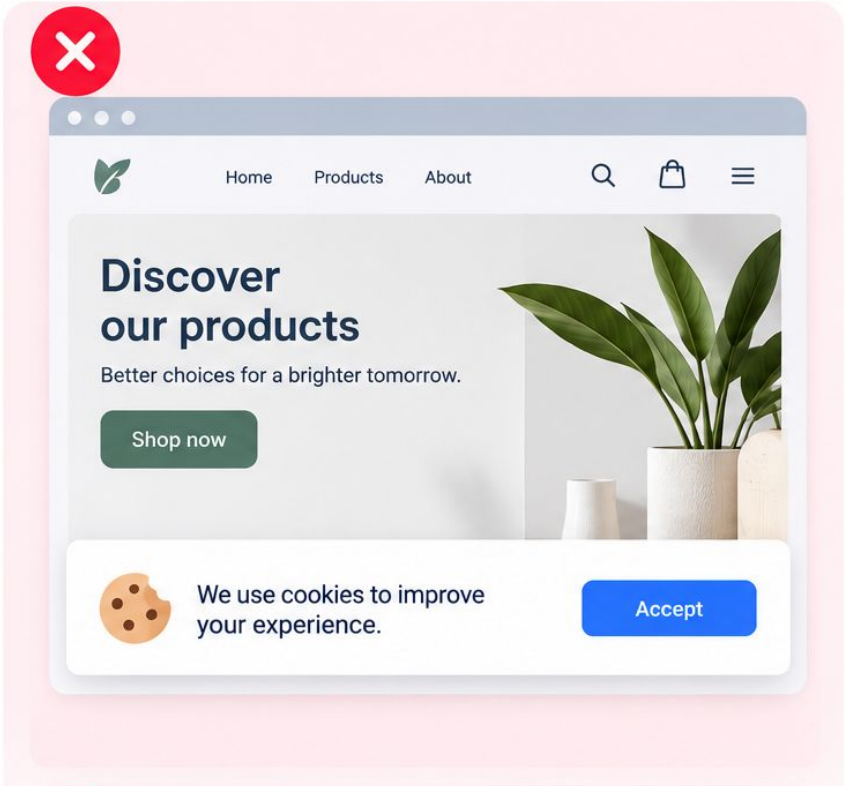

- Measure visits, behaviour and performance
- **Consent generally required** before activation

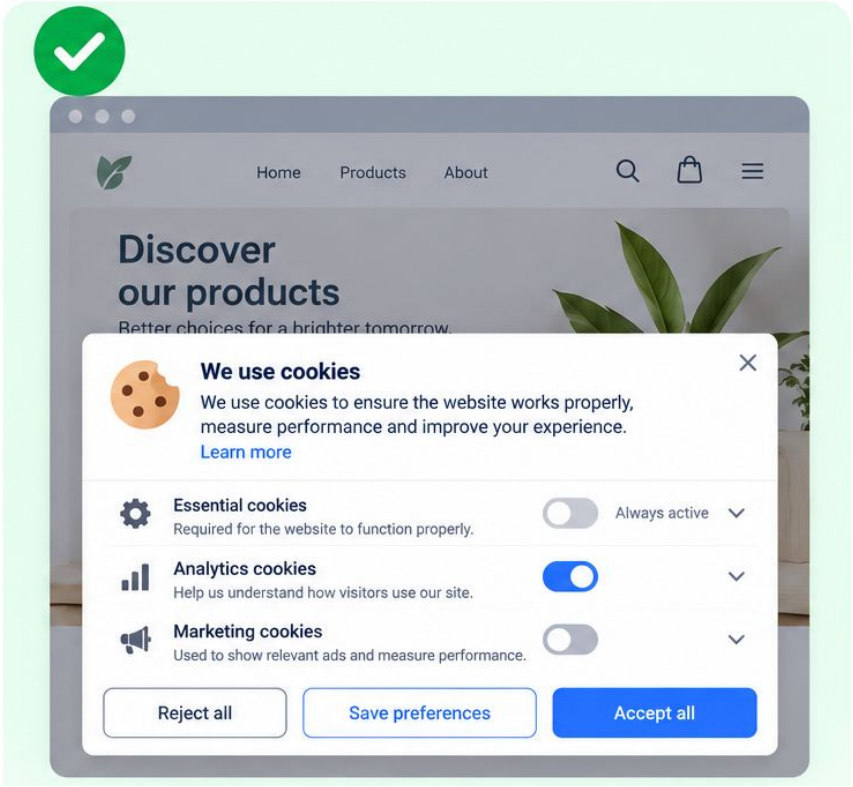

Analytical Consent

Before using analytics tools such as Google Analytics:

1. **Ask** — Clear cookie banner
2. **Explain** — What data is collected + why
3. **Let users choose** — Accept / Reject / Customize
4. **Respect the choice** — No analytics before consent
5. **Allow withdrawal** — Users can change choice later

Cookie & Analytical Consent

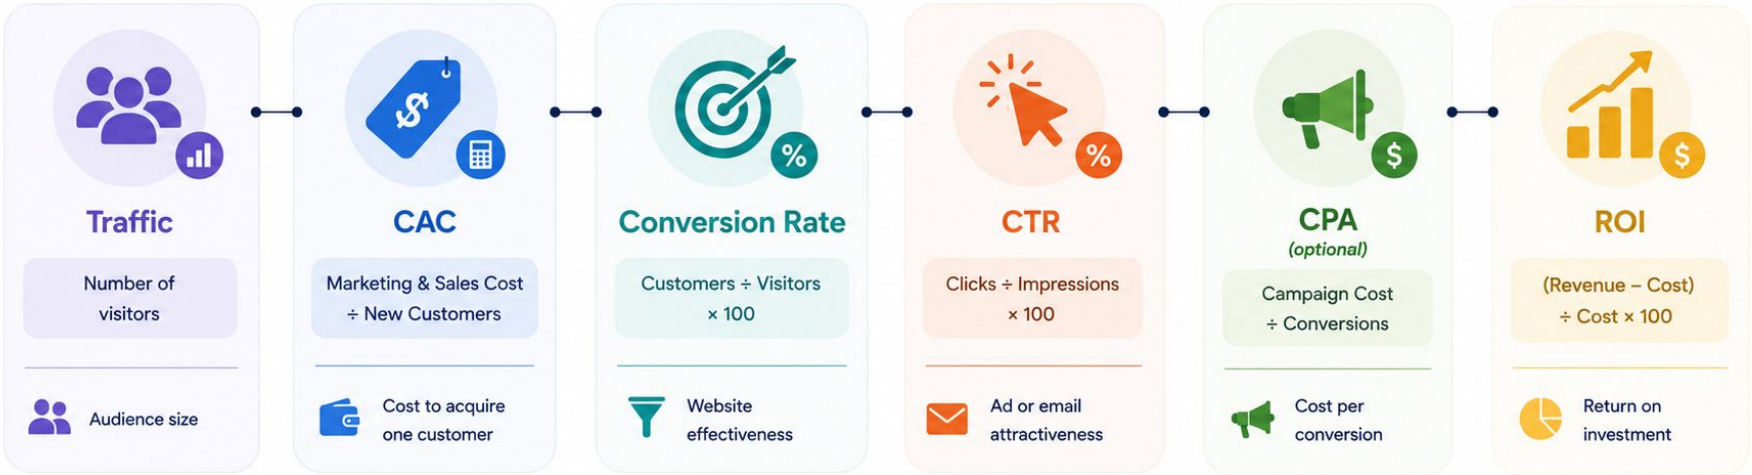

03

KPI

KPIs & Dashboards

Objective	KPI
Acquisition	**CAC** — Customer Acquisition Cost
Conversion	**Conversion Rate** — % of visitors who convert
Engagement	**CTR** — Click-Through Rate
Retention	**Retention Rate** — % of customers retained
Customer Value	**CLV** — Customer Lifetime Value
Advertising	**ROAS** — Return on Ad Spend
Satisfaction	**NPS** — Net Promoter Score

Acquisition KPI

Mini Case

KPI	Google Ads	Instagram Ads	Email Marketing
Budget	$8,000	$5,000	$2,000
Visitors	16,000	20,000	5,000
Customers	320	150	180
Revenue	$32,000	$18,000	$21,600

An online sportswear retailer tested three acquisition channels during one month.

1. Which channel has the highest **Conversion Rate**?
2. Which channel has the **lowest CAC**?
3. Which channel has the **highest ROI**?
4. If you could invest only one additional $5,000 next month, **which channel would you choose**? Why?

Mini Case

KPI	Google Ads	Instagram	Email
Conversion Rate	**2.0%**	**0.75%**	**3.6%**
CAC	**$25**	**$33.33**	**$11.11**
ROI	**300%**	**260%**	**980%**

Retention and Growth KPI

Mini Case

An online coffee subscription service analyzed three customer segments.
Which Customers Should the Company Focus On?

KPI	New Customers	Regular Customers	Loyal Customers
Retention Rate	55%	82%	96%
CLV	$120	$420	$980
NPS	+12	+46	+74

1. Which customer segment creates the highest long-term value?
2. Which segment is most satisfied?
3. Where should the company invest its retention budget? Why?

04

Digital Marketing *Today*

The Changing Customer Journey

1 Discover

- Becoming aware of a need or a solution
- Influenced by ads, social media, word of mouth, content
- Multiple touchpoints, multiple channels

2 Search

- Looking for information and options
- Search engines, reviews, blogs, communities
- Asking and validating

3 Compare

- Evaluating alternatives
- Features, prices, reviews, trust signals
- Seeking the best value and fit

4 Purchase

- Making the decision
- Payment, security, simplicity
- Expecting confirmation and delivery

5 Use

- Using the product or service
- Onboarding, support, customer experience
- Building satisfaction and trust

6 Recommend

- Sharing with others
- Reviews, ratings, referrals, social shares
- Becoming an advocate

The modern journey is non-linear and omnichannel.

Customers may jump between stages and touchpoints at any time.

Mobile · Website · Social Media · Email · Store · Customer Support

The Changing Customer Journey

AI is transforming:

Artificial Intelligence is reshaping the way brands attract, engage, and retain customers.

1

Content creation

AI generates ideas, writes, designs, and edits content faster and more efficiently.

2

Search

AI improves search relevance, understands intent, and delivers better results.

3

Advertising

AI optimizes targeting, bidding, and ad creative in real time for better performance.

4

Personalization

AI analyzes data to deliver personalized experiences and relevant offers at scale.

5

Analytics

AI uncovers insights, predicts trends, and helps make data-driven decisions.

6

Customer service

AI chatbots and virtual assistants offer 24/7 support and instant responses.

7

Automation

AI automates repetitive tasks and workflows, saving time and increasing efficiency.

The Limits of AI

Use AI to work faster and smarter but always verify and think critically.

1

Hallucinations

AI can generate convincing but incorrect or fabricated information.

2

Lack of judgment

AI predicts patterns, it doesn't truly understand context or business strategy.

3

Bias & data quality

Outputs depend on the quality and biases of the training data and prompts.

4

Privacy & security

Sensitive or confidential information should not be shared with public AI tools.

5

Human creativity

AI accelerates creation but cannot fully replace originality, empathy, or critical thinking.

6

Legal & copyright

Ownership, attribution, and copyright issues may arise with AI-generated content.

7

Human oversight

AI should assist decisions—not make important business decisions alone.

Ethics and the Attention Economy

1

Design for users, not addiction

Create experiences that solve problems—not manipulate behavior.

2

Respect privacy

Be transparent about data collection and give users control over their information.

3

Avoid dark patterns

Don't trick users with hidden fees, misleading buttons, or forced subscriptions.

4

Build trust

Honest communication and transparency create stronger long-term relationships.

5

Think long-term

Sustainable growth comes from customer satisfaction—not maximizing every click.

6

Use AI responsibly

Human oversight is essential to prevent bias, misinformation, and unethical decisions.

7

Success = Value + Trust

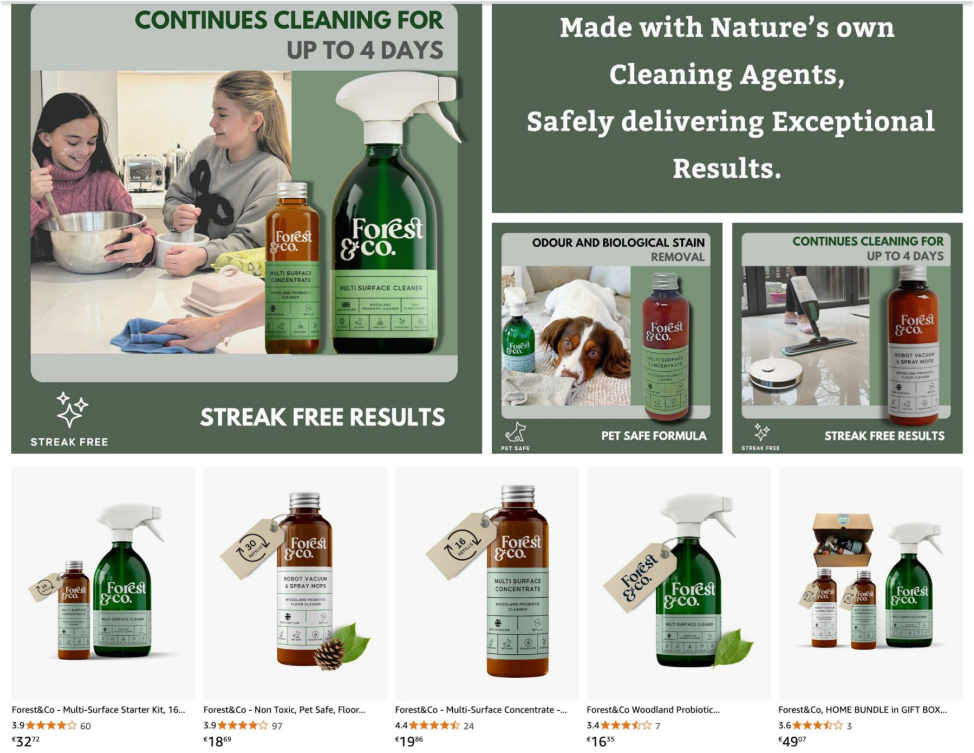

The best marketing creates value for both the business and the customer.

05
Case Study

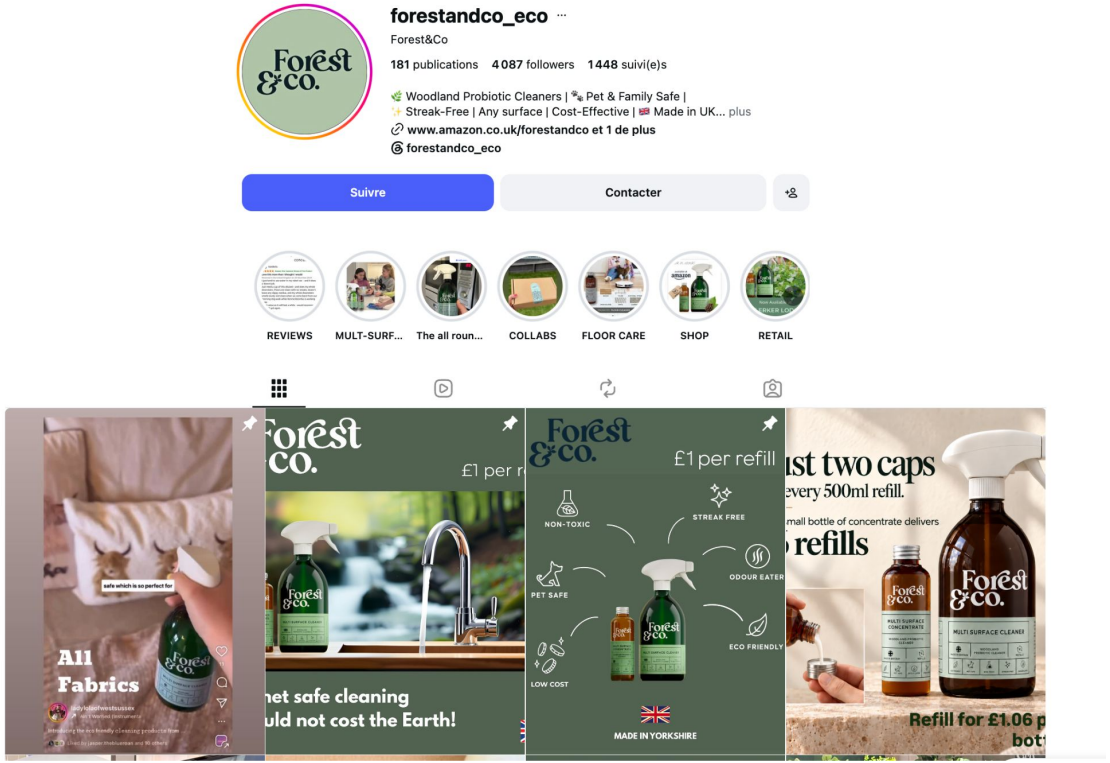

Forest & Co

Forest&Co. sells genuinely eco-friendly, pet-safe cleaning products and wants to fight greenwashing. The product is well-reviewed on Amazon, but almost no one knows the brand outside the marketplace.

https://www.amazon.co.uk/stores/page/E2363A3C-44EE-4D26-90AE-08C3BE95D175

Forest & Co

https://www.instagram.com/forestandco_eco/

Target & Persona

Primary

Health- and planet-conscious households (25–45)

- Healthy home
- Safe for kids & pets
- Real impact
- Shop online

Secondary

Pet owners and parents looking for non-toxic cleaning solutions.

- Pet-safe
- Family friendly

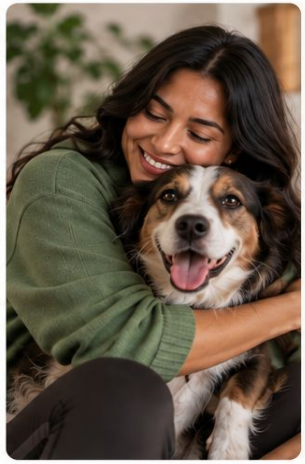

Conscious Clara

32 · Urban · 1 child

Health | Sustainability | Transparency

- Cleaner home
- Safe for her child
- Real impact

> *"I want a clean home that's safe for my family and the planet."*

Pet-parent Priya

29 · Suburban · Dog owner

Pet-safe | Non-toxic | Trusted brands

- Safe for pets
- Healthy home
- Kind to the planet

> *"If it's not safe for my dog, it's not coming into my home."*

SWOT Analysis

S Strengths

- **Clear mission:** Anti-greenwashing, pro-transparency in a crowded, confusing category.
- **Product credibility:** Pet-safe, non-toxic formulations with positive Amazon reviews.
- **Authentic story:** Founder-led brand with a genuine sustainability motive, not a corporate side project.
- **Niche focus:** Cleaning is a high-frequency category where trust and habit matter.

W Weaknesses

- **Low brand awareness:** Known mainly on Amazon; little recognition outside the marketplace.
- **Weak digital marketing:** Limited social presence, content, and community-building.
- **Small budget**
- **Dependence on Amazon:** Risky if algorithms, fees, or policies change; limited direct customer data.[emerald]

O Opportunities

- **Growing demand for ethical brands:** 73% of consumers say they prefer ethical/sustainable brands.
- **Greenwashing fatigue:** Consumers are skeptical and want proof, fitting Forest&Co.'s positioning.
- **Content & education:** Short-form video (TikTok/Reels) and email can explain ingredients, safety, and impact.
- **Partnerships:** Local zero-waste shops, pet communities, parenting groups, and eco influencers.

T Threats

- **Big-brand greenwashing:** Large CPG companies with big budgets can drown out small, honest voices.
- **Category noise:** Many "eco" cleaning brands with similar claims, making differentiation harder.
- **Economic pressure:** Cost-of-living squeezes force some consumers to trade down to cheaper options.
- **Regulatory & claim risk:** Increasing scrutiny on sustainability claims means overstatement backfires.

Strategic Priorities

01 Prove anti-greenwashing promise

Establish absolute transparency, rigorous product standards, and verifiable sustainability claims to build unshakeable customer trust.

02 Build direct audience beyond Amazon

Diversify sales channels, capture owned customer data, and cultivate a loyal DTC community to mitigate marketplace reliance.

03 Own a narrow, resonant niche

Focus deeply on target personas, such as pet parents and eco-conscious households, creating authentic emotional connections.

04 Leverage proof & community

Maximize organic growth through user-generated content, advocacy, and social proof rather than relying on heavy ad spend.

Customer Acquisition Strategy

01 Amazon Optimization

- **A+ Content overhaul:** Clear ingredient explainers & "what's NOT inside" panels.
- **Safety focus:** Pet-safe & kid-safe use cases in graphics & copy.
- **Social proof:** Highlight top reviews citing safety, scent, and results.
- **Targeted PPC:** Test keywords like "pet safe cleaner" & "non-toxic cleaning".

02 Instagram & TikTok Video

- **Cadence:** 3–4 short-form videos/week.
- **Content themes:** "Greenwashing vs real eco" (30-45s) & ingredient spotlights.
- **Pet Demos:** Relatable cleaning scenarios (e.g., post-park dog paw prints).
- **Hooks:** Direct 3-sec calls-to-action targeting pet parents.

03 Micro-Influencers & Communities

- **Creator partners:** Seeding creators (5k–50k followers) in pet care & eco parenting, product testing
- **Authentic briefs:** Request honest reviews rather than scripted ads.
- **Grassroots engagement:** Active value-first posts in Facebook & WhatsApp groups.

04 Local & Offline Partnerships

- **Partner network:** Local pet shops, vet clinics, zero-waste stores & parent groups.
- **Co-marketing:** Joint content featuring expert tips (e.g., "Vet's Top Home Safety Tips").

SEO Strategy

01 Search Positioning

Problem

“Forest&Co” returns homewares and cafés; the cleaning brand is invisible under its own name.

Strategic Choice

Treat brand name as secondary. Build visibility around problem + benefit + audience queries.

Core Positioning Statement

“Be the most visible result about pet-safe, non-toxic, honest eco cleaning products.”

1 Pet-Safe Cleaning

- “pet safe floor cleaner UK”
- “non toxic cleaner for dogs”
- “pet friendly kitchen cleaner”
- “safe cleaner for accidents”

2 Non-Toxic Focus

- “non toxic all purpose cleaner”
- “eco cleaner no harsh chemicals”
- “cleaner without synthetic fragrance”

3 Anti-Greenwash

- “how to spot greenwashing”
- “honest eco cleaning brands UK”
- “non greenwashing products”

4 Use-Case & Audience

- “cleaner for parents with kids”
- “safe floor cleaner for babies”
- “eco cleaner for renters w/ pets”

Influence Marketing (UGC)

Campaign Ideas

01 “Clean Without the Lies”

Message
“Eco cleaning that actually tells you what’s inside.”

Assets
Short videos comparing vague labels vs Forest&Co.’s specific claims.

Channels
TikTok, Reels, Instagram carousels, email.

02 “Pet-Safe Home Challenge”

Message
“Show us your pet-safe clean.”

Mechanic
Users post a 10–15 sec video of cleaning routine with pet in frame; best entries get a bundle or feature.

Channels
Instagram, TikTok, local pet groups.

03 “First Switch” Offer

Message
“Switch one product. See the difference.”

Mechanic
Discount or free shipping on first order when buying a core product (e.g., multi-surface cleaner).

Channels
Amazon coupons, site landing page, influencer codes.

Customer Experience

Goal: Make the first interaction clear, credible, and easy, especially for skeptical, label-reading customers.

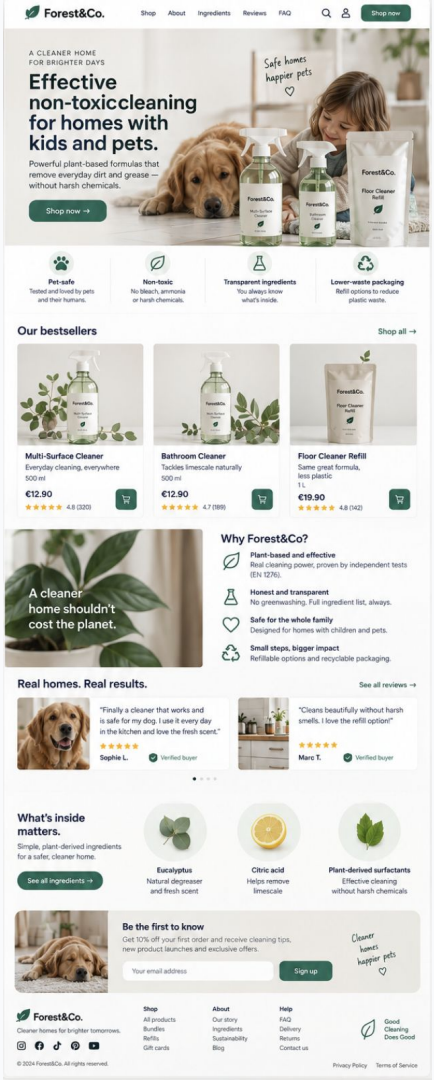

01 Website & Landing Pages

- **Simple DTC Site:** Clear hero stating “Honest, pet-safe cleaning products – no greenwashing.”
- **Transparent Product Pages:** Full ingredient list + plain-English explanations & safety rationales.
- **Social Proof & Our Story:** Real customer quotes/photos, founder mission, anti-greenwashing stance.
- **Dedicated Persona Landing Pages:** **/pet-safe-cleaning** (Priya) & **/parent-safe-home** (Clara) with 1 primary CTA & key proof points.

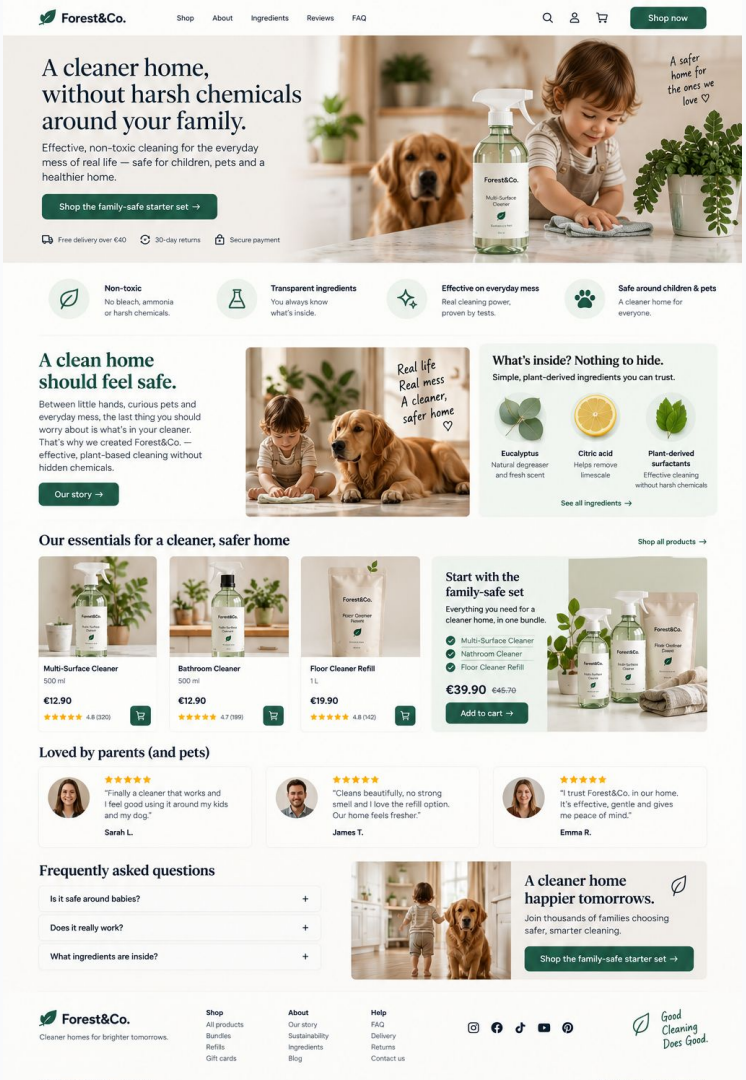

02 Content & SEO Strategy

- **Core Content Pillars:** Guides on spotting greenwashing, pet-safe standards, unused ingredients, & simple routines.
- **Long-Tail SEO Focus:** Target phrases like “pet safe floor cleaner UK” & “non toxic kitchen cleaner” across titles, H1s, & posts.
- **Multi-Format Content Repurposing:** Short articles (600–900w) repurposed into social carousels & 30–45s videos.

“Clara” Landing Page

“Priya” Landing Page

Customer Relationship / Retention & Networking

Goal: Turn first-time buyers into repeat customers and advocates, using proof, community, and simple referral mechanics.

1. Social Proof

Reviews & UGC System

- Post-purchase email (day 7–10): 1-question review.
- Feature customer photos/videos on social.

“Real Homes” Gallery

- Showcase customer photos in use (pets/kids).

Omnichannel Proof

- Top 3–5 review quotes on product pages.
- Weekly “Review of the Week” post.
- Newsletter testimonials section.

2. Referral & Loyalty

Simple Referral Program

- “Give £5, Get £5” dual-sided incentive.
- Unique referral link for existing buyers.
- Promote in emails & parcel insert cards.

3. Networking & Community

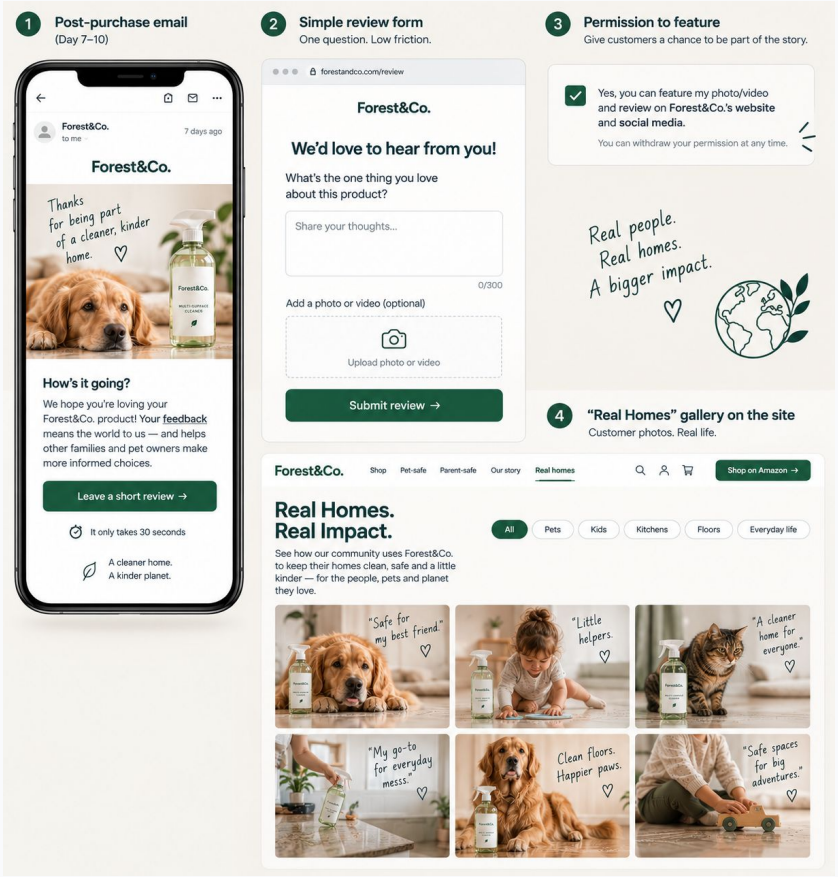

Community Building

- Branded hashtags (#PetSafeHome, #CleanWithoutTheLies).
- Repost customer content regularly.
- Quarterly mini-challenges & hacks.

Partnership Content

- Co-create with local vets & parenting bloggers.
- Offer affiliate codes/commissions.

UGC Content and Social Proof

06
Final Project

Final Project: Full Digital Marketing Strategy

Students work on a **new or unknown brand** and develop its full digital strategy.

1. Brand & Diagnosis

- Brand, product & features
- Target audience
- 1–2 personas
- Customer journey
- SWOT
- Competitive analysis
- Strategic priorities

2. Acquisition

- Choose **2–3 channels** and justify them
- SEO: keywords + search intent
- SEA: keywords + example campaign
- Social / Display / Influence / UGC: example campaign

3. Conversion

- Homepage
- SEO/campaign landing page
- Apply **conversion & UX best practices**

4. Retention

- Choose **at least 1**
- Email marketing
- Marketing automation
- Referral marketing

5. Data & Measure

- Strategic goals
- KPIs
- North Star Metric - justify it

Please send your projects to liubov.trebushkova@inalco.fr before **December 1st** (1 point of penalty for each day after this date).

Thanks!
